suggests that religion in its usual sense can be replaced by something better that the human spirit or subjectivity can be the
subject of scientific study and that lack of purpose or design in the universe is not a handicap but a positive opportunity for
intelligent beings to make of the universe and its contents what they reasonably can The book breaks new ground in
suggesting a radical alternative to religion It offers a scientific and humanist alternative to religion which appeals to people s
critical faculties rather than emotions or intuitions It also challenges current views of causation and the principle of sufficient
reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external
reality It develops and elaborates a notion of the noosphere within a theoretical system this enables the notion to assume a
scientific importance which it currently lacks because it is treated as an isolated eccentric and rather mystical idea
