Environmental Health Perspectives ,2007-08 *The Integration Debate* Chester Hartman,Gregory Squires,2009-09-11

Racial integration and policies intended to achieve greater integration continue to generate controversy in the United States with some of the most heated debates taking place among long standing advocates of racial equality Today many nonwhites express what has been referred to as integration exhaustion as they question the value of integration in today s world And many whites exhibit what has been labeled race fatigue arguing that we have done enough to reconcile the races Many policies have been implemented in efforts to open up traditionally restricted neighborhoods while others have been designed to diversify traditionally poor often nonwhite neighborhoods Still racial segregation persists along with the many social costs of such patterns of uneven development This book explores both long standing and emerging controversies over the nation s ongoing struggles with discrimination and segregation More urgently it offers guidance on how these barriers can be overcome to achieve truly balanced and integrated living patterns

Linking and Aligning Scores and Scales Neil J. Dorans,Mary Pommerich,Paul W. Holland,2007-10-15

In their preface to the second edition of *Test Equating Scaling and Linking* Mike Kolen and Bob Brennan 2004 made the following observation Prior to 1980 the subject of equating was ignored by most people in the measurement community except for psychometricians who had responsibility for equating p vii The authors went on to say that considerably more attention is now paid to equating indeed to all forms of linkages between tests and that this increased attention can be attributed to several factors 1 An increase in the number and variety of testing programs that use multiple forms and the recognition among professionals that these multiple forms need to be linked 2 Test developers and publishers in response to critics often refer to the role of linking in reporting scores 3 The accountability movement and fairness issues related to assessment have become much more visible Those of us who work in this field know that ensuring comparability of scores is not an easy thing to do Nonetheless our customers the test takers and score users either assume that scores on different forms of an assessment can be used interchangeably or like the critics

above ask us to justify our comparability assumptions And they are right to do this After all the test scores that we provide have an impact on decisions that affect people s choices and their future plans From an ethical point of view we are obligated to get it right
