| We lack the technology to create this type of energy on Earth | Source of energy outside the earth                                               | Nucleus splits apart releasing lighter elements, neutrons, and large amounts of energy |
| Energy produced from Uranium and Plutonium                    | Would produce an unlimited amount of clean energy                                | Lack of proper control leads to harmful radiation exposure that last for long time     |
| Naturally occurs in the sun                                   | Smaller nuclei collide and create larger element, releasing neutrons, and energy | Generates a lot of radioactive waste that                                              |
