Through close linguistic analysis of magazine and newspaper articles and radio talk, the study reveals that these discourses substitute balance, individual success, self-transformation and positive feelings for structural change and entrench the very issues hindering gender workplace equality. Chapters discuss topics such as sexism, work-family balance, extensive and intensive mothering, breadwinning, gender stereotypes, beauty work, synthetic sisterhood, media practices and gender equality policies. patterns used by the print media in their representation of trans people Through close analysis of a corpus of articles collected from English language newspapers from the UK and Canada Angela Zottola focuses on the semantic categories of representation associated with transgender identities Exploring a set of key terms this book examines the semantic prosody and the language choices that each term is invested with using Critical Discourse Analysis to investigate how the way the press represents this topic influences readers and their understanding of the major debates Using a mixture of quantitative and qualitative methods Transgender Identities in the Press casts light on the complex picture of press language during a period of social change and increasing awareness Highlighting both efforts to represent this community in an inclusive and non discriminatory way and areas where there is need for improvement this book illustrates a variety of issues from a critical and social perspective

Language, Gender and Sexual Identity Heiko Motschenbacher, 2010 This book makes an innovative contribution to the relatively young field of Queer Linguistics Subscribing to a poststructuralist framework it presents a critical deconstructionist perspective on the discursive construction of heteronormativity and gender binarism from a linguistic point of view On the one hand the book provides an outline of Queer approaches to issues of language gender and sexual identity that is of interest to students and scholars new to the field On the other hand the empirical analyses of language data represent material that also appeals to experts in the field The book deals with repercussions of the discursive materialisation of heteronormativity and gender binarism in various kinds of linguistic data These include stereotypical genderlects structural linguistic gender categories especially from a contrastive linguistic point of view the discursive sedimentation of female and feminine generics linguistic constructions of the gendered body in advertising and the usage of personal reference forms to create characters in Queer Cinema Throughout the book readers become aware of the wounding potential that gendered linguistic forms may possess in certain contexts

Language and Sexuality (through and) beyond Gender Costas Canakis, Venetia Kantsa, Kostas Yiannakopoulos, 2010-04-16 This volume is a collection of papers on aspects of language and sexuality as understood and problematized by scholars in linguistics and anthropology The idea behind this volume was to bring together people working on language and sexuality issues from within these two fields given that linguistic research on this topic is more often than not fieldwork related and anthropological research characteristically focuses on issues of sexual onomasiology and semasiology a concomitant of its preoccupation with social categories and categorization This endeavor is in many respects a continuation of the discussion on the social constitution of gender while following up on a slowly but steadily growing tradition of research on language and sexuality both in relation to gender and beyond it Although gender and sexuality may be thought of as distinct in principle they interact not only in the framework provided by heteronormativity but also in contexts where their presupposed alignment is questioned if not summarily rebuked Therefore if there is indeed something to be said about language and sexuality beyond gender any such discussion will also have to go through it On the other hand work on gendered language will have to co estimate the findings of research

on language and sexuality Contributors in this volume have assumed a variety of theoretical positions from which to tackle their diverse topics covering a wide range of sexually relevant language pertaining to heterosexual lesbian gay and queer experience but also to voice silence the unconscious and nationalism Issues of identities and desires inevitably take center stage in many of the papers reflecting dominant theoretical approaches and tensions in the field even as authors may remain skeptical of the usefulness of the ensuing polarizations At the same time the polyphony envisioned by the editors and contributors in this volume will be operative in the ongoing critical appraisal of theoretical stances towards the intricate indexical relation between language gender and sexuality
