Guide Du Medecin Nomade:

Galen's Method of Healing Richard Durling, Kudlien, 2018-07-17 This book includes papers presented in Kiel in 1982 on Galen's chief therapeutic manual the *Methodus medendi*. The papers describe the composition of the book its surgical content its emphasis on logic and its fortuna in medieval Islam and Renaissance Europe. No such study in depth of a major Galenic work has hitherto been attempted.

Al-Rāzī Peter Adamson, 2021 This book introduces readers to Abu Bakr al Razi known in Latin as Rhazes one of the most innovative and divisive figures of the early philosophical tradition in the Islamic world. Drawing on his extant works on ethics and a range of quotations and testimony from often hostile medieval authors Adamson reconstructs Razi's cosmological system which posits four principles alongside God for the making of the universe Soul Matter Time and Place. Adamson argues that this system is fundamentally based on Plato while it accepts Aristotle's physics as a relative or superficial description of the universe. This notorious theory of the five eternal led to charges of heresy. But through an examination of his debates with contemporary Islamic theologians and representatives of Ismaili Shiism Adamson shows that Razi's ideas about religion and prophecy may have been distorted by intellectual opponents. Razi's scientific contributions are also considered in depth. One chapter is devoted to the philosophically rewarding aspects of Razi's extensive writings on medicine. His ideas about alchemy are also discussed along with his atomist account of matter. The final chapter looks at Razi's views on ethics and argues against a prominent interpretation of him as a hedonist inspired by Epicureanism. The book presupposes no prior knowledge of Razi or specialist knowledge of this period in the history of philosophy. It will be rewarding for anyone with an interest in the reception of Greek philosophy especially Plato in the history of medicine or of medieval philosophy more generally.

Le traité médical فادلا بوعمران, 2010 La médecine arabe a commencé à se développer à partir du VIII^e siècle ap. J. C. dans la partie orientale du monde arabo-musulman recouvrant l'Iraq, la Syrie, la Palestine, l'Iran et l'Égypte. Cet essor tient probablement à l'importance de l'héritage légué par la Mésopotamie, l'Égypte, l'Inde et la Grèce, héritage dont les Arabes se sont saisis pour le traduire, l'assimiler, l'enrichir et le transmettre à leur tour. Le Maghreb et l'Espagne musulmane participèrent à cette avancée de la médecine arabe à partir du X^e siècle ap. J. C. Ibn al Jazjar à Kairouan, Al Zahrawi et Ibn Rushd à Cordoue et Ibn Zuhr à Séville vont apporter à cette discipline une contribution
