reduce deficits and extend our planet's life by another one hundred years Drawing on Einstein's famous $E=mc^2$ equation the book demonstrates how increase in economic stimulus c^2 is reducing the life m of our planet Scientists and climate change experts are now saying the planet may have only twenty five years remaining before it becomes uninhabitable New cross country models for driving change need This can be done using 3P simplification for currency tracing for medical tourism It needs to prevent another pandemic from happening again It needs to be scalable for an Interstellar movie type solution since our planet is dying
