Many students leave elementary school without developing the reading skills they need to succeed in middle and high schools. Meanwhile, educators at all levels are under more pressure to maximize students' literacy achievement. Here's a book that provides the leadership strategies and practices you need to rise to this challenge. With clear examples and basic steps, the authors describe a fail-safe literacy system that includes analyzing the strengths of your current approach and setting high expectations. Finding the hidden sources of information that reveal whether students are developing literacy behaviors. Identifying where to adjust your current curriculum and instruction. Planning literacy-focused professional development and continuous improvement. Note: This product listing is for the Adobe Acrobat PDF version of the book.

Critical Thinking and Formative Assessments Todd Stanley, Betsy Moore, 2013-09-05 Develop your students' critical thinking skills and prepare them to perform competitively in the classroom on state tests and beyond. In this book, Moore and Stanley show you how to effectively instruct your students to think on higher levels and how to assess their progress. As states implement the Common Core State Standards, teachers have been called upon to provide higher levels of rigor in their classrooms. Moore and Stanley demonstrate critical thinking as a key approach to accomplishing this goal. They explore the benefits of critical thinking and provide the tools you need to develop and monitor critical thinking skills in the classroom. Topics include: The Difference Between Higher Level and Lower Level Thinking; Writing Higher Level Thinking Questions; Assessing Critical Thinking Strategies to Develop Higher Level Thinking Skills.

Assessment of Higher Order Thinking Skills Gregory Schraw, Daniel H. Robinson, 2011-10-01 This volume examines the assessment of higher order thinking skills from the perspectives of applied cognitive psychology and measurement theory. The volume considers a variety of higher order thinking skills including problem solving, critical thinking, argumentation, decision making, creativity, metacognition, and self-regulation. Fourteen chapters by experts in learning and measurement comprise four sections which address conceptual approaches to understanding higher order thinking skills, cognitively oriented assessment models, thinking in the content domains, and practical assessment issues. The volume discusses models of thinking skills as well as applied issues related to the construction, validation, administration, and scoring of performance-based selected response and constructed response assessments. The goal of the volume is to promote a better theoretical understanding of higher order thinking in order to facilitate instruction and assessment of those skills among students in all K-12 content domains as well as professional licensure and certification settings.
