support the book's scientific integrity. The authors' second goal is to demonstrate the relevance of the topic to people's lives. Subsequently, the second part of the book examines many of the topics and research findings that are salient in the world today: political and international attitudes including terrorism, voting behavior, racism and prejudice, sexism and gender roles, and environmental attitudes. This thoroughly revised new edition features an entirely new chapter on implicit measures, attitudes, a new chapter on environmental attitudes, updated opinion poll data throughout the book, additional material on time trends in attitudes about many issues, and expanded updated sections on international attitudes reflecting the events of 9/11 and the subsequent invasions of Afghanistan and Iraq. Attitudes and Opinions: broad and interdisciplinary perspective makes this an ideal text in courses on attitudes, public opinion, survey research, or persuasion taught in a variety of departments including psychology, communication, marketing, sociology, and political science.
