[N.B. The figures in the right margin indicate full marks.]

Part 1—Reading Test

Marks—60

1. Read the following passage and answer the questions A and B :

Education gives us knowledge and a set of abilities to function meaningfully in life, such as the ability to decide things rationally and make the right choices. As we learn how to read, write and do the basic operations of arithmetic, we gain a degree of self confidence. We learn to think for ourselves and articulate our thoughts; we pick up skills to communicate with others and manage our affairs well. Education helps us think independently and make our own opinions. As we know more about the world, we appreciate the good things it offers us but also become critical of the deviations from the values it imparts and the rise of hatred of conflict that follows. The first thing education does is to give us an awareness about ourselves which leads to the development of our personality. As we begin school, we feel the need to belong to the class and make friends. We then expand our sense of belonging to include the school at large, our community and finally our country. Education thus prepares every child to become an active member of the community and work for its welfare. Education, is believed, releases our potentials and our inner strengths. It sharpens our intellect and develops our creativity. As we are taught to reason well and find solutions to the problems of life, we become productive members of society. Education by definition is progressive and liberal, teaching us to respect human diversity and cultural and religious differences. If all of us practise these values in life, the world becomes a much happier place.

Education also fosters critical thinking and provides us a set of competencies including life skills that enable us to become competitive even in the most challenging of circumstances. Education also teaches us to appreciate beauty and the bounties of nature.

School, however, is not the only place where a child gets education. A Bangla poem tells us that nature can be our best teacher. Here are a couple of lines from the poem in English translation :

The sky has taught me to be liberal.

The wind has given me the motto to be industrious.

If we can make nature our friend, philosopher and guide, we can learn lessons about life that, combined with what our schools teach us, will prepare us for the future.

Transforming Healthcare with the Internet of Things A. Ugon, B. Séroussi, C. Lovis, 2016-04-12

The current trend in health and social care systems is a shift from care provision to citizen driven health Only a few years ago the high tech devices used in healthcare were limited to health cards and personal portable devices These have since evolved dramatically to include wearables sensors and devices for measuring health values The application of such technologies has for the most part been welcomed by both patients and professionals It is the fact that these devices can be connected to and communicate with other connected devices and systems which has been the game changer in healthcare technology not least because it has empowered and will empower patients to take more control of their own healthcare management This book presents the proceedings of the Special Topic Conference STC of the European Federation for Medical Informatics EFMI held in Paris France in April 2016 The special topic this year is Transforming Healthcare with the Internet of Things The papers are divided into four sections transforming healthcare with the Internet of things societal dimensions of the Internet of things ontology and decision support and clinical information systems and data reuse with a further section for poster presentations The book will be of interest to all those involved in the provision and delivery of technology based healthcare

Emerging Topics in Hardware Security Mark Tehranipoor, 2021-04-30 This book provides an overview of emerging topics in the field of hardware security such as artificial intelligence and quantum computing and highlights how these technologies can be leveraged to secure hardware and assure electronics supply chains The authors are experts in emerging technologies traditional hardware design and hardware security and trust Readers will gain a comprehensive understanding of hardware security problems and how to overcome them through an efficient combination of conventional approaches and

emerging technologies enabling them to design secure reliable and trustworthy hardware [Australian Books in Print 1997](#)
Bowker,1997-03 excellent coverage essential to worldwide bibliographic coverage AMERICAN REFERENCE BOOKS

Hossain,2016-10-11 The entire capital became isolated from the rest of the country The Red Army tried to create anarchism
in the US and the entire world It was during this chaotic moment that Anwar and his companions escaped from jail
Afterwards they formed The Green Army and operated a mission called Operation Survival of USA to save the innocent
civilians of the nation from this dire situation With minimal support from the US government they had to immobilize the Red
Army In the meantime there was a misunderstanding between the US and other countries due this chaotic situation which
could have led to World War III Could the Green Army overcome all of these obstacles and save innocent lives Most
importantly could the USA survive **Technological innovations to address social isolation and loneliness in older
adults** Sue Ellen Levkoff,Marcia G. Ory,Hongtu Chen,Helianthe Kort,2022-12-22 *The Cognitive, Emotional and Neural
Correlates of Creativity* Matthijs Baas,Carsten K. W. De Dreu,Bernard A. Nijstad,2015-08-06 Across species humans have an
unsurpassed capacity for creative thought and innovation Human creativity is at the roots of extraordinary achievements in
the arts and sciences and enables individuals and their groups to adapt flexibly to changing circumstances to manage
complex social relations and to survive and prosper through social technological and medical innovations The ability to
generate novel and potentially useful ideas and problem solutions viz creativity is a key driver of human evolution and among
the most valued and sought after competencies in contemporary societies that struggle with complex problems and compete
for technological and economic supremacy Because creativity provides fitness functionality in both ancestral and
contemporary societies it stands to reason that i the human brain evolved to sustain and promote creative thinking and we
should be able to identify ii the brain circuitries genetic drivers and neurohormonal modulators of the human capacity for
creative problem solving and original ideation and iii the core cognitive and emotional processes underlying creative thought
In this Research Topic we bring together a collection of papers to provide an encyclopedic open access snapshot of the
current state of the art on the neural cognitive and emotional correlates of creativity [Australian Government Publications](#)
