A companion website provides review questions and the figures from the book in PowerPoint. Glen Mayhall, 2012-02-20 Thoroughly revised and updated for its Fourth Edition, this highly acclaimed volume is the most comprehensive reference on hospital epidemiology and infection control. Written by over 150 leading experts, this new edition examines every type of hospital-acquired nosocomial infection and addresses every issue relating to surveillance, prevention, and control of these infections in patients and in healthcare workers. This new edition features new or significantly increased coverage of emerging infectious diseases, avian influenza, governmental regulation of infection control, and payment practices related to hospital-acquired infections, molecular epidemiology, the increasing prevalence of community-acquired MRSA in healthcare facilities, system-wide infection control provisions for healthcare systems, hospital infection control issues following natural disasters, and antimicrobial stewardship in reducing the development of antimicrobial-resistant organisms. *Central Service Technical Manual* Iahcsmm, 2007-01-01 The 7th edition is designed to provide Central Service Professionals with the latest information on all aspects of sterile processing and to introduce future Central Service professionals to the fast-paced field of CS.
