Hedge Fund Regulation in the European Union Phoebus Athanassiou,2009-04-14 While hedge funds have been part and parcel of the global asset management landscape for well over fifty years it is only relatively recently that they came to prominence as one of the fastest growing and most vigorous sub sectors of the financial services industry Despite their growing significance for global and European financial markets hedge funds continue enjoying a sui generis regulatory status The ongoing credit crisis and its lessons for the wisdom of unregulated or loosely regulated pockets of financial activity raise with renewed

urgency the issue of deciding how long for the relative regulatory immunity of hedge funds is to be tolerated in the name of financial innovation This well thought out book the first of its kind in this particular field examines the case for the European onshore hedge fund industry s regulation making concrete proposals for its normative future Following a detailed account of the established regulatory systems in Ireland and Luxembourg as well as of the emerging hedge fund jurisdictions in Italy France Spain and Germany and of the regulatory treatment of hedge funds in the UK this book examines to what extent the continuing exclusion of hedge funds from harmonized European regulation is defensible whether their differences to traditional asset management products justify their distinct regulatory treatment and ultimately if their EU wide regulation is possible and if so what form this should take This book offers enormously valuable insights into all facets of the subject of the regulation of hedge funds including the legitimacy of the public policy interest in their activities the conceptual underpinnings and systemic stability emphasis of a realistic hedge fund regulatory scheme the main parameters of a workable onshore hedge fund regulatory framework the role of investor protection and market integrity as part of a holistic hedge fund regulatory scheme the possible use of the UCITS framework as a foundation for the EU wide regulation of hedge funds the MiFID s impact on the regulatory future of the European hedge fund industry existing cross jurisdictional differences and similarities in the normative treatment of hedge funds within the EU hitherto initiatives and recommendations of the Community institutions and bodies and the need for more efficient co operation and information sharing arrangements amongst national supervisors for the monitoring of the cross border risks inherent in the activities of hedge funds As the first ever comprehensive account of the profile main features and normative future of the contemporary global and European hedge fund markets including a systematic inquiry into the conceptual underpinnings of hedge fund regulation and a detailed examination of the European hedge fund industry s treatment under Community and domestic law this book represents a major contribution to the literature on hedge funds and their regulation which through its concrete proposals for the onshore industry s regulation and its clear analysis of the conditions necessary for their implementation should be of extraordinary value to policymakers supervisors and academics alike

Exploration of Index-Based Insurance for Smallholder Farmers in Mozambique Israel Muchena, 2025-01-28 The current seeds regulations in Mozambique specify amongst other things minimum required standards of germination rates depending on type variety and stage of development of the seed We were aware that formal seed markets relied on research and development of seed breeds for assurance of the required quality and for innovations such as drought resistant varieties Given the application of these essential risk control measures in this key input and the broad network of seed distribution channels we believed that seed suppliers could play a critical role in the marketing of our proposed complimentary climate risk mitigation product to serve our common goals of protecting and increasing resilience of agricultural primary production We explain in this book how we implemented this idea and the various questions that we explored in our index based insurance extension project including the following How could

we enhance standard product guarantees of seed companies to offer additional protection against critical climate related risks How could we embed climate risk insurance in formal seed systems without adding cost for the end beneficiaries What technology and distribution innovations should we consider for the purposes of ensuring that we can monitor cost effectively covered risks What value adding services should be made available to support the risk carriers the distribution partners and the smallholder farmers How did we promote agricultural risk literacy using indigenous knowledge systems located in ancient African oral traditional stories that were part of the customs of our target population Caveat Insurer™: 2023
