

1 General information and precautions

General information

The IAW Weber-Marelli single point injection (SPI) system is a self-contained engine management system, which controls both the fuel injection and ignition (see illustration). This Chapter deals with the fuel injection system components only - refer to Chapter 5B for details of the ignition system components.

The fuel injection system comprises a fuel tank, an electric fuel pump, a fuel filter, fuel supply and return lines, a throttle body with an integral electronic fuel injector, and an Electronic Control Unit (ECU) together with its associated sensors, actuators and wiring.

The fuel pump delivers a constant supply of fuel through a cartridge filter to the throttle body, and the fuel pressure regulator (integral with the throttle body) maintains a constant fuel pressure at the fuel injector and returns excess fuel to the tank via the return line. This

constant flow system also helps to reduce fuel temperature and prevents vaporisation.

The fuel injector is opened and closed by an Electronic Control Unit (ECU), which calculates the injection timing and duration according to engine speed, throttle position and rate of opening, inlet air temperature, coolant temperature and exhaust gas oxygen content information, received from sensors mounted on the engine.

Inlet air is drawn into the engine through the air cleaner, which contains a renewable paper filter element. The inlet air temperature is regulated by a vacuum operated valve mounted in the air ducting, which blends air at ambient temperature with hot air, drawn from over the exhaust manifold.

Idle speed is controlled by a stepper motor located on the side of the throttle body. Cold starting enrichment is controlled by the ECU using the coolant temperature and inlet air temperature parameters to increase the injector opening duration.

The exhaust gas oxygen content is constantly monitored by the ECU via the Lambda (oxygen) sensor, which is mounted in

the exhaust downpipe. The ECU then uses this information to modify the injection timing and duration to maintain the optimum air/fuel ratio. An exhaust catalyst is fitted to all SPI models. The ECU also controls the operation of the activated charcoal filter evaporative loss system - refer to Chapter 4D for further details.

It should be noted that fault diagnosis of the IAW Weber-Marelli system is only possible with dedicated electronic test equipment. Problems with the system should therefore be referred to a Fiat dealer for assessment. Once the fault has been identified, the removal/refitting procedures detailed in the following Sections can then be followed.

Precautions

Warning: Many procedures in this Chapter require the removal of fuel lines and connections, which may result in fuel spillage. Before carrying out any operation on the fuel system, refer to the precautions given in Safety first at the beginning of this manual, and follow them implicitly. Petrol is a highly dangerous and volatile liquid, and the precautions

Desert Shield and Desert Storm Howard K. Butler, 1991 The Iraqi invasion of Kuwait on August the 2nd 1990 and the resultant decision by the President to deploy land air and naval forces to protect Saudi Arabia and the United Arab Emirates led since August the 8th 1990 to a steady measured commitment of soldiers sailors airmen and supporting equipment to Southwest Asia That commitment which began approaching its apparent apex by early November suddenly broadened on the 8th of that month when the President expanded the original defensive objective to entail the liberation of Kuwait His policy addendum called for doubling the 200 000 men in Southwest Asia to about 400 000 and he gave Iraq a January the 15th 1991 deadline to quit Kuwait or face massive military force Overall American policy in this matter could therefore be considered roughly three phased one the original defensive deployment of 200 000 strong August 8 November 8 1990 two the reinforcement to attack strength of about 400 000 November 8 1990 to January 15 1991 and three January 16 1991 to
