1 Introduction

In this Installation Guide template we have included different installation scenarios based on our experience in deploying applications. As some of these may not be relevant to your installation plan, please remove those which are not applicable and, where necessary, update the sample text to reflect your system requirements. We have included sample text to illustrate the type of material that is generally provided in these documents.

1.1 Purpose of this document

Introduce the system or components to be installed. If applicable, identify any benefits that will arise from this installation, e.g. improved performance, system stability, as well as business, technological, or organizational objectives that may be achieved.

Sample introduction:

This guide covers the installation of [system] and its related components, including migrating to [system X.x.x] from [system X.x]; preparing your servers for installation of [system] and other related components; deploying your database, both manually and automatically; and database optimization and partitioning.

1.2 Identification

- Identify the system to which this document applies, e.g. title(s), abbreviation(s), version number(s), and release number(s).
- Identify any standards (ANSI, ISO, IEEE, etc) that apply to this plan.

1.3 Reference information

- Identify current sources of information that can be used for reference.
- Identify the location, status, and owners for specifications, existing documentation, art work

1.4 Points of Contact

- List the main points of contact for this document, e.g. for troubleshooting and/or queries regarding the content. Include the contact name, department, telephone number, and e-mail address.
- List the organizations that require coordination between the project and its specific support function (e.g., Development Dept, Testing Dept.).

Visualization Handbook Charles D. Hansen, Chris R. Johnson, 2011-08-30 The Visualization Handbook provides an overview of the field of visualization by presenting the basic concepts, providing a snapshot of current visualization software systems, and examining research topics that are advancing the field. This text is intended for a broad audience, including not only the visualization expert seeking advanced methods to solve a particular problem, but also the novice looking for general background information on visualization topics. The largest collection of state-of-the-art visualization research yet gathered in a single volume, this book includes articles by a who's who of international scientific visualization researchers covering every aspect of the discipline, including Virtual environments for visualization, Basic visualization algorithms, Large scale data visualization, Scalar data isosurface methods, Visualization software and frameworks, Scalar data volume rendering, Perceptual issues in visualization, Various application topics, including information visualization. Edited by two of the best known people in the world on the subject, chapter authors are authoritative experts in their own fields. Covers a wide range of topics in 47 chapters representing the state of the art of scientific visualization. **Fedora 11 Installation Guide** Fedora Documentation Project, 2009-07 The Fedora Installation Guide covers installation of Fedora, a Linux distribution built on free and open source software. **sed & awk** Dale Dougherty, Arnold Robbins, 1997-03-01 sed and awk describe two text processing programs that are mainstays of the UNIX programmer's toolbox. sed is a stream editor for editing streams of text that might be too large to edit as a single file or that might be generated on the fly as part of a larger data processing step. The most common operation done with sed is substitution, replacing one block of text with another. awk is a complete programming language. Unlike many conventional languages, awk is data driven; you specify what kind of data you are interested in, and the operations to be performed when that data is found. awk does many things for you, including automatically opening and closing data files, reading records, breaking the records up into fields, and counting the records. While awk provides the features of most conventional programming languages, it also includes some unconventional features, such as extended regular expression matching and associative arrays. sed and awk describe both programs in detail and include a chapter of example sed and awk scripts. This edition covers features of sed and awk that are mandated by the POSIX standard. This most notably affects awk, where POSIX standardized a new variable CONVFMT and new functions toupper and tolower. The CONVFMT variable

specifies the conversion format to use when converting numbers to strings awk used to use OFMT for this purpose The toupper and tolower functions each take a presumably mixed case string argument and return a new version of the string with all letters translated to the corresponding case In addition this edition covers GNU sed newly available since the first edition It also updates the first edition coverage of Bell Labs nawk and GNU awk gawk covers mawk an additional freely available implementation of awk and briefly discusses three commercial versions of awk MKS awk Thompson Automation awk tawk and Videosoft VSAwk
