

## Rotary blowers for nitrogen conveying

### Model: Omega PN

#### Field of application

Some bulk materials have to be transported within a closed system under a nitrogen atmosphere.

Leakages from all system components – including rotary blowers – should therefore be kept to an absolute minimum. For such applications, specially-developed PN series blowers are available with three different drive shaft sealing technology, as well as wear-free slide ring seals.

Complete systems with integrated Omega PN blower are also available for nitrogen conveying applications.

## Vacuum blowers with pre-inlet cooling

### Model: Omega PV

#### Field of application

For use in low vacuum ranges up to 100 mbar (a or 500 mbar vacuum).

#### Function

If vacuum (yellow) occurs between the rotor and the housing, ambient air (blue) enters the blower which is circulated pre-cooled channels as the rotors continue to turn. The two volume flows subsequently combine and the arising compression heat is dissipated throughout a much larger volume of trapped air. This approach therefore achieves the same discharge temperatures that are produced by normal power blower.

#### Application examples

Stationary application: Centralised vacuum production (left photo)

Portable application: Station and air vehicles (right photo)
