The Homeschooling Parent Teaches MATH! Kerridwen Mangala McNamara, 2023-11-10 We all worry about our kids learning math Even if the kids are in school there s always a concern Sometimes it s about the kid s concern sometimes it s about their teacher s concern parent teacher or otherwise But a lot of the time it s about US It s about our own math phobias those fears dislikes or aversions that we picked up from our own math experiences and that we inadvertently pass on to our kids We don t want them to be afraid of math we know that limits their opportunities and makes their lives harder and costs them more money but we just can t help it This book is here to help you deal with your own math

phobias and come to if not outright enjoy math to at least appreciate it and be able to convey it to your kids without passing on the fear

Kerridwen Mangala McNamara is NOT a math lover but she is a math appreciator and has worked through most of these issues herself Let her help you along your homeschooling journey and show you how to fight the Fear of Math monster so that it no longer intimidates you or your kids *Mimi'S Garden of Reflections* Shamimi Shamsuddin,2016-01-08

This is about the beautiful journey I had throughout my teaching year in 2015 In the span of one year I have gone beyond my official portfolio as a mathematics teacher to become an accountant a financial advisor an English motivator a Thinking Skills course instructor as well as a science projects advisor Some would call this versatility Is it You tell me This is about my exploration into the heart of Borneo to the rural and to the urban territories for work and for pleasure It is by no way a suffice travelogue but you can count on it taking you somewhere unfamiliar from your comfy chair This is a diary It was shared with only a handful of people I trust with my thoughts Now Im trusting you There were some pressing issues I cared to share but couldnt do much with Who knows Maybe you can This is my garden of reflections Reflecting on anything I felt strongly connected to Reflected and translated in the form of free flow writings poems as well as selected book and film review related to education in general Mathematics in Politics and Governance Francisco J. Aragón-Artacho,Miguel A. Goberna,2024-04-05

This book presents the mathematical tools that politicians use to make rational decisions about health education culture economy finance transportation and national defense for their citizens The selection of topics addressed is based on the experiences of four veteran politicians who have doctorates or master s degrees in mathematics The exposition also considers the mathematical tools used by politicians to capture votes or optimize their impact on the design of electoral districts i e gerrymandering without forgetting the mathematics applied to parliamentary activity and political science Aimed at a general educated readership a basic knowledge of mathematics is the only requisite to understanding most of the book Certain sections denoted in the book with a star contain more advanced material and require some knowledge of undergraduate math A later chapter is dedicated to applications and techniques of machine learning and the final chapter discusses a variety of cases where political decisions have affected mathematical development Readers gravitating towards this book are those who are curious about the history of mathematics including optimizers and mathematicians who would like to learn more about the historical roots of their discipline There will also be strong appeal to mathematically oriented economists political scientists and people generally interested in mathematics Mathematics is or it should be an important part of our culture The impact of mathematics is sometimes silent but a powerful one The authors of this book did an incredible work in digging out areas of mathematical reasoning that pervades social and political life Reading this book we will all enrich our vision of mathematics value for society Nuno Crato Professor of Applied Mathematics University of Lisbon former minister of Education and Science of Portugal 2011 2015 This monograph shows in an impressive way that mathematics can be very helpful in making and evaluating political decisions and that it is indispensable in the progressive

penetration of all areas of society with scientific methods This also includes politics Not everything in politics can be justified or related to mathematics but politics should not be made in contradiction to mathematical truths For me this is a central message of this publication Johanna Wanka Professor of Applied Mathematics Merseburg University of Applied Sciences former Minister of Education and Research Germany 2013 2018
