Example of Graph (students may create this in different ways, but the graph will show a peak and then a drop in the population)

Deer Population vs. Year

1. During 1906 and 1907, what two methods did the Forest Service use to protect the Kaibab deer? **hunting was banned and predators were killed.**
2. Were these methods successful? Use the data from your graph to support your answer. **The deer population increased rapidly, which can be considered a success, at least at first.**
3. Why do you suppose the population of deer declined in 1925, although the elimination of predators occurred? **overpopulated deer died to starvation or disease.**
4. Why do you think the deer population size in 1900 was 4,000 when it is estimated that the plateau has a carrying capacity of 30,000? **overgrazing of the area made the food supply smaller; not enough plants to feed population; competition with farm animals.**
5. Based on these lessons, suggest what YOU would have done in the following years to manage deer herds.
1915: **reduced the number of grazing animals in the area to give more room to the deer populations; allowed hunting to reduce populations; possibly add more predators such as wolves to slow population growth and prevent mass starvation.**
1925: **at this point the deer population were already declining rapidly; resources of the area may have been depleted due to overpopulation; you could add more deer or reduce hunting or predators to allow the deer to recover, but you wouldn't want to eliminate it entirely or the cycle would just start over again.**
6. It is a criticism of many population ecologists that the pattern of population increase and subsequent crash of the deer population would have occurred even if the bounty had not been placed on the predators. Do you agree or disagree with this statement. **Explain your reasoning. Answers vary; predators do have a place in ecosystems to keep prey species from becoming overpopulated. Students should be able to explain why the support the reintroduction of prey species.**
7. What future management plans would you suggest for the Kaibab deer herd? **Controlled hunting; possibly birth control for deer to keep the numbers smaller; introduce more predators; answers vary.**
