

EDUC 450: Professional Clinical Practice
Reflective Lesson Plan Model

Name: Steven Walker

Date: 2/21/14

PART I: PLANNING

Title of Lesson	Comparing Rational Numbers
Source	<i>Is this lesson original idea? If not, from what source did I borrow this lesson?</i> • South Carolina PASS Coach 7th Grade Mathematics workbook • Carnegie Learning Resource
Subject Area (s)	Mathematics
Grade Level	7th
Curriculum Standards	• 7-2.2- Represent the location of rational numbers and square roots of perfect squares on a number line. • 7-2.3- Compare rational numbers, percentages, and square roots of perfect squares by using the symbols $<$, $>$, $\leq$, $\geq$, and $=$.
Description and Background Information	Describe the lesson's activities and content to provide a clear overview of the lesson. TLWBAT compare rational numbers by translating them into one type of number: fraction, decimal, or whole number "depending on given numbers" and putting points on the number line.
Lesson Objectives	What will students be able to do at the conclusion of this lesson? Make sure that your objective(s) are measurable. TLWBAT compare rational numbers using inequalities and putting points on the number line.
Varying Objectives for Individuals Needs	How will I vary these objectives for students who do not understand the material? Students who are new to rational numbers, at the beginning of the lesson I will explain to the students what rational numbers are and how they can be translated into different types of rational numbers. How will I vary these objectives for students who have already mastered the concept? These students will be given extra practice comparing larger numbers as the rest of the class catches up to them. How will I vary these objectives for students who are presently learning English? These students will be given the same notes and will work with their mentors to get the best understanding they can get. Also they can see me after school for more assistance.
Statement of Purpose	Why is it important for the students to learn this content? This lesson will open the door for students as they will need to know how to compare percentages, taxes, tips, and know how to translate rational numbers, knowing that just because a number is written one way doesn't mean it cannot be written another way.
