

Part C**Variation of the Prisoner's Dilemma Game**

You are in a class with one other student. It is the end of the semester, and final exams are in a week. Your teacher has said the final exam will be graded so that anyone who scores the class average on the final exam will receive a "B" in the class. Anyone who scores above the average will receive an "A" in the class, and anyone who scores below the average will fail the class. You would certainly score higher on the exam than the other student. You and the other student have made an agreement not to take the final exam so that the class average is zero and you both receive "B" grades.

6. Determine the three basic elements of the game.

- (A) The players:
- (B) The strategies for each player:
- (C) The payoffs for each player:

7. Create a payoff matrix for this game.

8. What is your dominant strategy? (Underline the correct answer)

Take the Exam or Not Take the Exam

9. Using a four-point scale (A = 4, B = 3, C = 2 and D = 1), which choice results in the highest class GPA?

If you finished Parts B and C correctly, you will realize that when each player chooses his or her dominant strategy, the result is unattractive to the group.

The key to avoiding the prisoner's dilemma outcome of lower payoffs for both players is to find a way for players to credibly commit to playing a dominated strategy. Merely having both prisoners agree to Not Confess or both students to Not Take the Exam will not work. This results because it is always optimal for Prisoner 1 (or Prisoner 2) to still play the Confess strategy, and it is always optimal

Gaining Ground Clifford Winston, 2021-08-17 Focusing on ways that markets work with rather than against governments to enhance public welfare The optimal mix of market forces and government intervention to allocate resources is one of the longest standing problems facing human civilization At the theoretical extremes resources in centrally planned economies are allocated by the government while resources in capitalist economies are allocated by private markets In practice market forces and government interventions co exist to allocate goods and services in a political environment with shifting pressures to give one approach more responsibility than the other Current public attitudes toward markets are at a low point in the wake of the Great Recession and the growth in income inequality that began in the 1970s However in this book noted Brookings economist Clifford Winston argues that it is a serious mistake to overlook that markets will be a critical part of the solution to any public objective whether it be to reduce inequality stimulate long term growth slow climate change or eliminate COVID 19 In Winston s view policymakers should be much more aware of the many ways that markets help government to achieve economic and social goals and the potential that markets have to provide greater assistance in achieving those goals Winston synthesizes the empirical evidence on the efficacy of markets in helping to protect consumers against anti competitive behavior and when technology appears to prevent price competition to enable individuals to make more informed decisions and to reduce negative externalities improve public production and encourage innovations Importantly Winston presents evidence indicating how markets can also help to reduce poverty promote fairness in labor markets and provide merit goods Winston subjects his assessment to a robustness test by explaining how market forces have helped to address the COVID 19 pandemic by for example finding new ways for people to work safely and providing incentives for pharmaceutical companies to develop safe and effective vaccines Winston takes a proactive approach in his conclusion by suggesting the formation of a major Commission composed of academics policymakers and businesspeople Such a panel could explore how market forces could provide greater help to government to address economic and social problems and could provide specific recommendations to facilitate market solutions where appropriate
