Student/Teacher Actions (what students and teachers should be doing to facilitate learning)

1. Tell students they will play a Four in a Row game. Group students into pairs, and give each pair a set of Fraction Strips, a Fraction Chart, a Four in a Row Game Board, and four different colored counters to be used as board markers. Also, give each student a Adding and Subtracting Fractions Recording Sheet.
2. Let each student pair decide who goes first. Player 1 chooses two fractions on the Fraction Chart that can be added or subtracted to get one of the answers on the game board. Player 1 must demonstrate the problem with the fraction strips (or with another method), after which he or she places the pieces with a marker. Once an answer on the game board has been covered, it cannot be used again. Have students repeat their plays on the recording sheet.
3. Player 2 now takes a turn. Play continues until someone covers four fractions in a row on the game board—horizontally, vertically, or diagonally.
4. After the game, have a class discussion about the strategies the students used, pointing out the mathematics involved.
