

Teleflex Marine Mechanical Steering

Steering Connection Kits Overview:

There are four basic types of connections for mechanical steering.

Tilt Tube Mount

This is the most popular steering cable-to-engine connection method for outboards with an ABYC standard tilt tube. This installation requires the use of a link arm which can be purchased from the engine manufacturer.

Parts Required: Engine Manufacturer's Link Arm

TILT TUBE MOUNTING

Transom Support Mount

This cable connection is used for older model outboards without tilt tubes, low HP outboards or applications where transom design interferes with standard tilt tube mounting.

Parts Required: D, G & H

Master Kits (Include D, G & H):

Stainless Steel Transom Mount Kit SA27255P or

Corrosion Resistant Transom Mount Kit SA27256P

(See following pages for individual components.)

TRANSOM SUPPORT MOUNTING

Splashwell Mount

This cable connection is used on boats where standard tilt tube or transom support mounting methods are precluded by a splashwell box or lack of engine tilt tube. The mounting surface is usually near perpendicular to the transom and between 12 and 16 inches from the center line of the boat and/or tiller (25-33" total splashwell width).

Parts Required: B, H (90°) or A, H (15°)

Master Kits (Include H & A/B):

90° Splashwell Mount Kit SA27254P or

15° Splashwell Mount Kit SA27253P

(See following pages for individual components.)

SPLASHWELL MOUNTING

Inboard Stringer Support Mount

This connection is used on inboards and is attached to a stringer or suitable mounting bracket below deck. The cable is perpendicular to the centered tiller and in half stroke for proper operation. An additional bracket may be needed to support the bail post. Available in heavy duty "Ski Boat" versions, with either long (4.5") or short (2.25") post standoff.

Parts Required: E, G, H (long post) or

F, G, H (short post)

(See following pages for individual components.)

INBOARD STRINGER SUPPORT MOUNTING

Manual QI Marine Shift
