

Child Behavior Checklist

The **Child Behavior Checklist (CBCL)** is a widely used caregiver report form identifying problem behavior in children.^{[1][2]} It is widely used in both research and clinical practice with youths. It has been translated into more than 90 languages,^[3] and normative data are available integrating information from multiple societies. Because a core set of the items have been included in every version of the CBCL since the 1980s, it provides a meter stick for measuring whether amounts of behavior problems have changed over time or across societies. This is a helpful complement to other approaches for looking at rates of mental-health issues, as the definitions of disorders have changed repeatedly over the same time frame.

It is a component in the Achenbach System of Empirically Based Assessment developed by Thomas M. Achenbach.

Versions and nature of test

Across versions, the first pages of the CBCL record demographic information and ratings of positive behaviors, academic functioning (school aged version only), and social competence. The last two pages list common behavior problems, each listed as a brief statement about the child's behavior, e.g., *Acts too young for his/her age*. Responses are recorded on a Likert scale: **0 = Not True**, **1 = Somewhat or Sometimes True**, **2 = Very True or Often True**. The Child Behavior Checklist exists in **two different versions**, depending on the **age of the child** being referred to.

Pre-school

For the **preschool version of the CBCL** (CBCL/1½-5), parents or others who interact with the child in regular contexts rate the child's behavior. Respondents rate the child's behavior on a 3-point scale (**not true**, **somewhat or sometimes true**, and **very true or often true**), and are instructed to rate the behavior as it occurs now or within the previous two months. This delineation differs from the instructions on other age-versions, due to the fact that rapid development and behavioral changes in the preschool age range are common. The preschool checklist contains 100 problem behavior questions.

School-age

Like on the preschool version, the **school-age version of the CBCL** (CBCL/6-18) instructs a respondent who knows the child well (usually a **parent** or other close caregiver) to report on the child's problems. Alternative measures are available for teachers (the **Teacher's Report Form**) and the child (the Youth Self Report, for youths age 11 to 18 years). The school-age checklist contains **118 problem behavior questions**.
