Cullen,2012-12-06 The widespread interest in stressful aspects of contemporary society which contribute to its burden of illness and diseases e g gastro intestinal cardiovascular has led to a large number of state ments and reports which relate the manifestations to a maladaptation of the individual Furthermore recent research suggests that under some condi tions stress may have a more generalized effect of decreasing the body IS ability to combat destructive forces and expose it to a variety of diseases Breakdown in adaptation occurs when an individual cannot cope with demands inherent in his environment These may be due to an excessive mental or physical load including factors of a social or psychological nature and task performance requirements ranging from those which are monotonous simple and repetitive to complex fast decision taking ones Experience shows however that not all people placed under the same condi tions suffer similarly and it follows that to the social and psychological environment should be added a genetic factor influencing through the brain the responses of individuals It is clear that besides human suffering this breakdown in adaptation causes massive losses of revenue to industry and national heal th authorities Thus a reduction in stress before breakdown occurs or an improvement in coping with it would be very valuable Handbook of Scales for Research in Crime and Delinquency Stanley L. Brodsky,H. O'Neal Smitherman,2013-06-29 In contrast to the great diversity of other crime and delinquency research measures those drawn from the CPI and the MMPI have much in common They are taken from standardized instruments administered under controlled conditions with known stimulus properties and validity indicators The CPI and MMPI measures will frequently be instruments of choice in research on personality and psychodynamics of offenders CHAPTER 6 Law Enforcement and Police This chapter encompasses a variety of scales that refer to law enforcement or police agencies Unfortunately in the case of many scales these terms are used simply with the assumption that the respondents understand the concepts and use them in the same way as researchers In other cases however specific policing functions are identified and described As noted in Chapter 3 a standard order of scale presentation is followed First the attitudes scales are presented followed by the behavior ratings per sonality measures milieu ratings prediction measures and finally the very broad category of description After the reviews are completed within each subcategory other scales in that category are listed See Chapter 2 for a description of the criteria that were used in deciding upon whether a scale would be reviewed or simply listed Listed scales are presented by title and bibliographic reference followed by a very brief description *The ...
