Maths Ssscheme For 2nd Term Academy:

Social World of Pupil Assessment Andrew Pollard, Ann Filer, 2000-06-01 Defining Assessment in the widest possible way ann Filer and Andrew Pollard have produced the most comprehensive ethnographic study of assessment ever attempted Their case studies cover all of the most important questions concerning assessment The findings which are both profound and unsettling have major implications for educational practice and policy particularly on how supposedly objective assessment processes depend on their context and are vulnerable to both bias and distortion In this colorful and reliable work Filer and Pollard have provided the definitive study of assessment in the 5 11 age range *National Education* ,1967

successful schools By doing so he offers a vision that is both instructive and inspirational one that shows how schools working with parents and the wider community can raise the standards of achievement for all their pupils Issues in Logic, Operations, and Computational Mathematics and Geometry: 2011 Edition ,2012-01-09 Issues in Logic Operations and Computational Mathematics and Geometry 2011 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Logic Operations and Computational Mathematics and Geometry The editors have built Issues in Logic Operations and Computational Mathematics and Geometry 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Logic Operations and Computational Mathematics and Geometry in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Logic Operations and Computational Mathematics and Geometry 2011 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com> *Layer-Adapted Meshes for Reaction-Convection-Diffusion Problems* Torsten Linß,2009-11-21 This is a book on numerical methods for singular perturbation problems in particular stationary reaction convection diffusion problems exhibiting layer behaviour More precisely it is devoted to the construction and analysis of layer adapted meshes underlying these numerical methods Numerical methods for singularly perturbed differential equations have been studied since the early 1970s and the research frontier has been constantly expanding since A comprehensive exposition of the state of the art in the analysis of numerical methods for singular perturbation problems is published in 2008 As that monograph covers a big variety of numerical methods it only contains a rather short introduction to layer adapted meshes while the present book is exclusively dedicated to that subject An early important contribution towards the optimisation of numerical methods by means of special meshes was made by N S Bakhvalov in 1969 His paper spawned a lively discussion in the literature with a number of further meshes being proposed and applied to various singular perturbation problems However in the mid 1980s this development stalled but was enlivened again by G I Shishkin s proposal of piecewise equidistant meshes in the early 1990s Because of their very simple structure they are often much easier to analyse than other meshes although they give numerical approximations that are inferior to solutions on computing meshes Shishkin meshes for numerous problems and numerical methods have been studied since and they are still very much in vogue
