

Career Essay

Construction management dates back as early as 1869 to 1883 when the Brooklyn bridge was constructed. Construction managers plan, direct, and coordinate usually through subordinate supervisory personnel, activities concerned with the construction and maintenance of structures, facilities and systems. They also work more than 40 hours a week and some projects require work for 24 hours a day. For my career I chose to be construction manager.

Construction management dates back to the Brooklyn bridge. Without construction management, jobs wouldn't get done. If construction managers were not on the job, the construction workers wouldn't know what to do. Standards within the profession became more elaborate after the construction manager method delivered high quality results. In the early 1980's, universities with their research teams started to conceptualize their corresponding Construction Management Programs. Construction managers recognized how they helped deliver high quality results as demanded by clients.

Construction management has also had some great innovations. Over the years construction managers got new technology like better computer systems. This can help plan and manage projects. This can also help manage schedules for workers. Construction managers also got more advanced tools and vehicles. The more advanced tools help complete a variety of projects. The vehicles help get around through tough terrain or to lift very heavy objects.
