In its 2019 annual report Amazon has a large distribution network (Amazon, 2019). In the retail industry, the company's distribution network is unmatched by its competitors in terms of resources and capabilities of distribution. Mainly, the company's global network is powered by the large network of several fulfillment centers, which assist the company to directly reach millions of others with millions of consumers. The strong local and regional distribution network drives most of the company's sales and profits, making it a key asset of the organization. Also, the delivery network is sustainable given that none of the competitors has the resources and capabilities of achieving a similar distribution network. The ability of other companies to afford such a delivery network makes it rare.
