Franck,2012-05-05 Almost since the beginning of the republic America s rigorous separation of powers among Executive Legislative and Judicial Branches has been umpired by the federal judiciary It may seem surprising then that many otherwise ordinary cases are not decided in court even when they include allegations that the President or Congress has violated a law or the Constitution itself Most of these orphan cases are shunned by the judiciary simply because they have foreign policy aspects In refusing to address the issues involved judges indicate that judicial review like politics should stop at the water s edge and foreign policy managers find it convenient to agree Thomas Franck however maintains that when courts invoke the political question doctrine to justify such reticence they evade a constitutional duty In his view whether the government has acted constitutionally in sending men and women to die in foreign battles is just as appropriate an issue for a court to decide as whether property has been taken without due process In this revisionist work Franck proposes ways to subject the conduct of foreign policy to the rule of law without compromising either judicial integrity or the national interest By examining the historical origins of the separation of powers in the American constitutional tradition with comparative reference to the practices of judiciaries in other federal systems he broadens and enriches discussions of an important national issue that has particular significance for critical debate about the imperial presidency **Reading**

Royal Commission on Labour,1893 **An Emergent European Executive Order** Jarle Trondal,2010-02-25 This book poses two pertinent questions First if a European executive order is emerging how can we empirically see it Second if a European executive order is emerging how can we explain everyday decision making processes within it The goal of this book is two fold First it identifies key institutional components of an emergent European executive order The nucleus of this order is the European Commission The Commission however is increasingly supplemented by a mushrooming parallel administration of EU level agencies and EU committees This book provides fresh empirical survey and interview data on the everyday decision making behaviour role perceptions and identities among European civil servants who participate within these institutions Secondly this book claims and empirically substantiates that an emergent European executive order is a compound executive order balancing a limited set of key decision making dynamics One message of this book is that an emergent European executive order consists of a compound set of supranational departmental epistemic and intergovernmental decision making dynamics Arguably a compound European executive order transforms the inherent Westphalian order to the extent that intergovernmentalism is transcended and supplemented by a multidimensional mix of supranational departmental and or epistemic dynamics This book also theoretically explores conditions under which these decision making dynamics gain prevalence It is argued that the decision making dynamics emerging within an emergent European executive order are conditioned by the formal organisation of its composite parts and by the patterns of social interaction that emerge among its civil servants Political processes and political systems can neither be adequately understood nor explained without including the organisational dimension of executive orders *Hearings* United States.
