Katrin Kleemann

Exeter Weather Report England:

A Mist Connection Katrin Kleemann, 2023-06-06 In the summer of 1783 an unusual dry fog descended upon large parts of the northern hemisphere The fog brought with it bloodred sunsets a foul sulfuric odor and a host of other peculiar weather events Inspired by the Enlightenment many naturalists attempted to find reasonable explanations for these occurrences Between 8 June 1783 and 7 February 1784 a 27 kilometer long fissure volcano erupted in the Icelandic highlands It produced the largest volume of lava released by any volcanic eruption on planet Earth in the last millennium In Iceland the eruption led to the death of one fifth of the population The jetstream carried its volcanic gases further afield to Europe and beyond where they settled as a fog the origin of which puzzled naturalists and laypersons A Mist Connection is an environmental history that documents the Laki eruption and its consequences for Iceland and the wider world The book combines methods of historical disaster research climate history global history history of science and geology in an interdisciplinary approach Icelandic flood lava eruptions of this scale have a statistical recurrence period of 200 to 500 years it is crucial to understand their nature so that we can prepare for the next one An eruption of this magnitude would surely be disastrous for our modern globalized and interconnected world *Extreme Weather* Robert K. Doe, 2016-01-12 This book is about weather extremes in the United Kingdom It presents fascinating and detailed insights into tornadoes supercell and non supercell tornadoes historical and contemporary case studies frequency and spatial distributions and unique data on extreme events thunderstorms epic event analysis and observing hailstorms intensity distributions and frequency of high magnitude events lightning lightning as a hazard impacts and injuries ball lightning definitions impacts and case studies flooding historical and contemporary analysis extreme rainfall and flash flooding snowfalls heavy snowfall days and events It also looks at researching weather extremes provides guidance on performing post storm site investigations and details what is involved in severe weather forecasting It is written by members directors and past and present Heads of the research group the Tornado and Storm Research Organisation TORRO With fifteen chapters thematically arranged and data appendix including a new tornado map of the U K this book presents a wealth of information on meteorological extremes This volume is aimed primarily at researchers in the field of meteorology and climatology but will also be of interest to advanced undergraduate students taking relevant courses in this area Flood Forecasting Thomas E. Fundamentals of Weather and Climate Robin McIlveen, 2010-05-27 Originally published in 1986 as Basic meteorology a physical outline
Victorian Science and Imagery Nancy Rose Marshall, 2021-07-27 The nineteenth century was a period of science and imagery when scientific theories and discoveries challenged longstanding boundaries between animal plant and human and when art and visual culture produced new notions about the place of the human in the natural world Just as scientists relied on graphic representation to conceptualize their ideas artists moved seamlessly between scientific debate and creative expression to support or contradict popular scientific theories such as Darwin's theory of evolution and sexual selection deliberately drawing on concepts in ways that allowed them to refute popular claims or disrupt conventional knowledges Focusing on the close kinship between the arts and sciences during the Victorian period the art historians contributing to this volume reveal the unique ways in which nineteenth century British and American visual culture participated in making science and in which science informed art at a crucial moment in the history of the development of the modern world Together they explore topics in geology meteorology medicine anatomy evolution and zoology as well as a range of media from photography to oil painting They remind us that science and art are not tightly compartmentalized separate influences Rather these are fields that share forms manifest as waves layers lines or geometries that invest in the idea of the evolution of form and that generate surprisingly kindred responses such as pain pleasure empathy and sympathy

Modelling the Impact of Climate Change on Water Resources C. Fai Fung, Ana Lopez, Mark New, 2011-07-05 The quantitative assessment of the impact of climate change on water availability and water resources management requires knowledge of climate hydro geo logical and water resources models and particularly the relationships between each of them This book brings together world experts on each of these aspects distilling each complex topic into concise and easy to understand chapters in which both the uses and limitations of modelling are explored The book concludes with a set of case studies using real life examples to illustrate the steps required and the problems that can be faced in assessing the potential impacts of climate change on water resource systems For students scientists engineers and decision makers alike this book provides an invaluable and critical look at the information that is provided by climate models and the ways it is used in modelling water systems A key focus is the exploration of how uncertainties may accrue at each stage of an impacts assessment and the reliability of the resulting information The book is a practical guide to understanding the opportunities and pitfalls in the quantitative assessment of climate change impacts and adaptation in the water resource sector
The Contemporary Medieval in Practice Clare A. Lees, Gillian R. Overing, 2019-10-07 Contemporary arts both practice and methods offer medieval scholars innovative ways to examine explore and reframe the past Medievalists offer contemporary

studies insights into cultural works of the past that have been made or reworked in the present Creative critical writing invites the adaptation of scholarly style using forms such as the dialogue short essay and the poem these are the authors argue appropriate ways to explore innovative pathways from the contemporary to the medieval and vice versa Speculative and non traditional The Contemporary Medieval in Practice adapts the conventional scholarly essay to reflect its cross disciplinary creative subject This book does Medieval Studies differently by bringing it into relation with the field of contemporary arts and by making practice in the sense used by contemporary arts and by creative critical writing central to it Intersecting with a number of urgent critical discourses and cultural practices such as the study of the environment and the ethics of understanding bodies identities and histories this short accessible book offers medievalists a distinctive voice in multi disciplinary trans chronological collaborative conversations about the Humanities Its subject is early medieval British culture often termed Anglo Saxon Studies c 500 1100 and its relation with use of and re working in contemporary visual poetic and material culture after 1950 The Contemporary Medieval in Practice is both wise and unafraid to take risks Fully embedded in scholarship yet reaching into unmapped territory the authors move across disciplines and forge surprising links Thought provoking and evocative this is a book that will have an impact that far belies its modest length Linda Anderson Newcastle University

Monthly Weather Report ,1924 **Regional Climates of the British Isles** Julian Mayes,Dennis Wheeler,2002-09-11 Global climate and the effects of global warming are commanding unprecedented interest as climates grow more dynamic and changeable How does global warming change patterns of climate Why is the weather and climate of the British Isles so variable Regional Climates of the British Isles presents a comprehensive and up to date survey of the diverse climate of the British Isles Examining the ways in which regional climates evolve from the interplay of meteorological conditions and geography of the British Isles leading climatologists provide detailed explanations of the climatic characteristics of eleven regions of the British Isles Climatic distinctiveness and local weather contrasts are described for each region together with a summary of climatic data from 1961 to the present Reviewing the history and causes of climatic change and evaluating regional models Regional Climates of the British Isles offers an important analysis of climatic variations Examining future climatic change and its likely consequences the authors acknowledge the need for regionally diverse responses to the greenhouse effect

I Can Only Paint Irene Gammel,2022-03-30 For Canadian impressionist Mary Riter Hamilton capturing the emotional landscape of battlefields and graveyards in the months after the Great War s armistice became an artistic calling and defined her work A woman alone after the storm had passed she found that her life after the war was indelibly marked by the experience Undeterred by a rejection from the Canadian War Memorials Fund who nominated only male war artists abroad in 1919 Hamilton received a commission from the Amputation Club of British Columbia now the War Amps to commemorate those lost at war She travelled from Victoria to the pre reconstruction battlefields and towns of the Somme Vimy Ridge and the Ypres Salient where amid harsh conditions inadequate shelter and food surroundings littered with unexploded shells she recorded with determination pride and grace the ruins of war Based on intensive archival research in Canada France and Belgium and using many previously unpublished letters I Can Only Paint offers an insider s view of the artist s vast underexplored body of war work and the conditions in which she created it It places this period central though it was in the context of a full understanding of her life and restores the work she created there to its proper place in the canon of war art in Canada and abroad Irene Gammel argues that Hamilton s work encoded a female perspective that distinguishes her paintings from the work of official Canadian war artists The first reliable account of Hamilton s impressions of Canada s most haunting sites of conflict I Can Only Paint captures with detail and sensitivity an experience that defined her life and recovers a body of work that stands as a unique and enduring portrait of the effects of the Great War

Climate Science, Solutions and Services for Net Zero, Climate-Resilient Food Systems Pete Falloon,Aled Jones,Siemen Van Berkum,Stefan Kepinski,Mike Rivington,2024-05-06 Food systems are both a major contributor to global greenhouse gas emissions and are strongly impacted by climate change and weather extremes Solutions to deliver net zero food systems therefore need to take climate impacts adaptation and resilience into account in order to ensure they are appropriate in a changing climate and do not conflict with adaptation goals In a similar way adaptation options for the food system must consider potential trade offs consequences and synergies with net zero and other objectives such as the Sustainable Development Goals Solutions for net zero climate resilient food systems will therefore require systematic interdisciplinary approaches across academia governments business NGOs and the public
