Geograph Memorandum Grade November 2014:

The Geography of Injustice Barak Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption *The Geography of Injustice* offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history

After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers *After the Education Wars* helps us to see a better way forward Cathy N Davidson The New York Times Book Review *After the Education Wars* is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world *After the Education Wars* explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform *After the Education Wars* makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools

The Russian State and Russian Energy Companies, 1992-2018 Ingerid M. Opdahl, 2020-06-09 The Russian State and Russian Energy Companies

analyses the development of relations between the state and five major energy companies and how this shaped Russia's foreign policy in the post Soviet region. The book argues that the development of Russia's political economy mattered for foreign policy over the quarter of a century from 1992 to 2018. Energy companies' roles in institutional development enabled them to influence foreign policy formation and they became available as tools to implement foreign policy. The extent to which it happened for each company varied with their accessibility to the Russian state. Institutional development increased state capacity in a way that strengthened Russia's political regime. The book shows how the combined power of several companies in the gas, oil, electricity and nuclear energy industry was a key feature of Russian foreign policy both in bilateral relationships and in support of Russia's regional position. In this way, Russia's energy resources were converted to regional influence. The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post Soviet states.

Cyclescapes of the Unequal City John G. Stehlin, 2019-10-01. A critical look at the political economy of urban bicycle infrastructure in the United States. Not long ago, bicycling in the city was considered a radical statement or a last resort, and few cyclists braved the inhospitable streets of most American cities. Today, however, the urban cyclist represents progress and the urban renaissance. City leaders now undertake ambitious new bicycle infrastructure plans and bike share schemes to promote the environmental, social and economic health of the city and its residents. *Cyclescapes of the Unequal City* contextualizes and critically examines this new wave of bicycling in American cities, exploring how bicycle infrastructure planning has become a key symbol of and site of conflict over uneven urban development. John G. Stehlin traces bicycling's rise in popularity as a key policy solution for American cities facing the environmental, economic and social contradictions of the previous century of sprawl. Using in-depth case studies from San Francisco, Philadelphia and Detroit, he argues that the mission of bicycle advocacy has converged with and reshaped the urban growth machine around a model of livable, environmentally friendly and innovation-based urban capitalism. While advocates envision a more sustainable city for all, the deployment of bicycle infrastructure within the framework of the neoliberal city in many ways intensifies divisions along lines of race, class and space. *Cyclescapes of the Unequal City* speaks to a growing interest in bicycling as an urban economic and environmental strategy, its role in the politics of gentrification and efforts to build more diverse coalitions of bicycle advocates. Grounding its analysis in both regional political economy and neighborhood-based ethnography, this book ultimately uses the bicycle as a lens to view major shifts in today's American city.

From Head Shops to Whole Foods Joshua C. Davis, 2017-08-08. In the 1960s and 70s, a diverse range of storefronts, including head shops, African American bookstores, feminist businesses and organic grocers, brought the work of the New Left, Black Power, feminism, environmentalism and other movements into the marketplace. Through shared ownership, limited growth and democratic workplaces, these activist entrepreneurs offered alternatives to conventional profit-driven corporate business models. By the middle of the 1970s, thousands of these enterprises operated across the United States, but only a

handful survive today Some such as Whole Foods Market have abandoned their quest for collective political change in favor of maximizing profits Vividly portraying the struggles successes and sacrifices of these unlikely entrepreneurs From Head Shops to Whole Foods writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption social enterprise buying local and mission driven business while also showing how today s companies have adopted the language but not often the mission of liberation and social change

Sustainable Peace in Northeast Asia Yong-Shik Lee,2023-09-05 Sustainable Peace in Northeast Asia examines the causes of lasting and complex tensions in the region from underlying political historical military and economic perspectives discusses their historical development and political economic implications for the world and explores possible solutions to build lasting peace The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances diplomacy trade and investment The book also discusses the influence of these external powers over the crisis their political and economic objectives in the region their strategies and the dynamics that their engagement has created Both South Korea and North Korea have sought reunification of the Korean peninsula which will have a substantial impact on the region The book examines its justification feasibility and effects for the region The book discusses the role of Mongolia in the context of the power dynamics in Northeast Asia A relatively small country in terms of its population Mongolia has rarely been examined in this context Sustainable Peace in Northeast Asia makes a fresh assessment of its potential role

[A World More Concrete](#) N. D. B. Connolly,2014-08-25 Connolly argues that Americans immigrants and even indigenous people between the 1890s and the 1960s made tremendous investments in racial apartheid largely in an effort to govern growing cities and to unleash the value of land as real estate Through a focus on South Florida the book illustrates how entrepreneurs used land and debates over property rights to negotiate the workings of Jim Crow segregation

Schooling Corporate Citizens Ronald W. Evans,2014-11-27 Schooling Corporate Citizens examines the full history of accountability reform in the United States from its origins in the 1970s and 1980s to the development of the Common Core in recent years Based in extensive archival research it traces the origins and development of accountability reform as marked by key government and business led reports from A Nation at Risk to No Child Left Behind and Race to the Top By using the lens of social studies and civic education as a means to understand the concrete impacts of accountability reforms on schools Evans shows how reformers have applied principles of business management to schools in extreme ways damaging civic education and undermining democratic learning The first full length narrative account of accountability reform and its impact on social studies and civic education Schooling Corporate Citizens offers

crucial insights to the ongoing process of American school reform shedding light on its dilemmas and possibilities and allowing for thoughtful consideration of future reform efforts Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971 New York Public Library.
