

### 9/10/13: Nothing Ever Happens on 90<sup>th</sup> Street

I think that Eva didn't realize how exciting her street was until she wrote the story. I think this because there were so many different things happening on 90<sup>th</sup> street, but she never took the time to realize it. For example, a simple event like the pizza delivery man falling down and being helped up by Alexis Leora turned into so much more. Alexis and the pizza delivery man fell in love because of this small encounter. I wonder if this will now be an "eye-opening" experience for her and she'll stop taking these everyday people and events for granted.

This reminds me of a time where I went away to college. I always thought the town that I grew up in was boring, but then when I came home for the first time, I looked around at all of the "little things." I never realized it at the time, but my town was not boring at all, it was, in fact, a very exciting and interesting place.

Preparation of Trial Balance and Rectification of Errors - English Navneet Singh, A trial balance is a financial statement that lists all the general ledger accounts of a company along with their respective debit or credit balances It serves as a preliminary step in the accounting process to ensure that the total debits equal the total credits in the company's records thereby verifying the accuracy of the accounting entries Here's an overview of how a trial balance is prepared

Collect General Ledger Balances Gather the balances of all general ledger accounts from the company's accounting records These balances include both debit and credit balances List Accounts in Trial Balance Prepare a list of all general ledger accounts arranged in a systematic order such as by account number or account type Each account is listed along with its respective debit or credit balance Calculate Total Debits and Credits Calculate the total debits and total credits by summing up the balances of all accounts in the trial balance The total debits should equal the total credits if the accounting entries have been recorded accurately Verify Equality of Debits and Credits Compare the total debits with the total credits to ensure that they are equal If the totals match it indicates that the accounting entries are balanced and that the trial balance is in equilibrium Investigate Discrepancies If the total debits do not equal the total credits investigate any discrepancies or errors that may have occurred in recording the accounting transactions Common errors include posting mistakes incorrect account classifications or omitted entries Adjust Accounts Make any necessary adjustments to correct errors or reconcile discrepancies in the trial balance This may involve reclassifying accounts posting adjusting entries or correcting data entry errors Recheck Trial Balance After adjusting recheck the trial balance to ensure that the total debits now equal the total credits Continue to investigate and adjust until the trial balance balances Finalize Trial Balance Once the trial balance

balances finalize the document by adding a heading and date Retain the trial balance for reference and use in preparing other financial statements such as the income statement and balance sheet The trial balance provides a snapshot of the company s financial position at a specific point in time and serves as an essential tool for verifying the accuracy of accounting records before preparing financial statements
