 conducting meta analysis using structural equation modeling Structural equation modeling SEM and meta analysis are two
 powerful statistical methods in the educational social behavioral and medical sciences They are often treated as two
 unrelated topics in the literature This book presents a unified framework on analyzing meta analytic data within the SEM
 framework and illustrates how to conduct meta analysis using the metaSEM package in the R statistical environment Meta
 Analysis A Structural Equation Modeling Approach begins by introducing the importance of SEM and meta analysis in
 answering research questions Key ideas in meta analysis and SEM are briefly reviewed and various meta analytic models are
 then introduced and linked to the SEM framework Fixed random and mixed effects models in univariate and multivariate
 meta analyses three level meta analysis and meta analytic structural equation modeling are introduced Advanced topics such
 as using restricted maximum likelihood estimation method and handling missing covariates are also covered Readers will

learn a single framework to apply both meta analysis and SEM Examples in R and in Mplus are included This book will be a valuable resource for statistical and academic researchers and graduate students carrying out meta analyses and will also be useful to researchers and statisticians using SEM in biostatistics Basic knowledge of either SEM or meta analysis will be helpful in understanding the materials in this book **CAHPER Journal** Canadian Association for Health, Physical Education and Recreation,1969
