Tibetan Buddhist Philosophy of Mind and Nature Douglas S. Duckworth, 2019 Tibetan Buddhist Philosophy of Mind and Nature is a philosophical overview of Tibetan Buddhist thought Charting the different ways Buddhist traditions in Tibet configure the relationship between Madhyamaka and Mind Only Duckworth shows how these configurations inform the shape of distinct contemplative practices

Reflections on Reality Jeffrey Hopkins, 2007 This is the second volume in Jeffrey Hopkins valuable series on the Mind Only School of Buddhism and a focal description of it in Dzong Ka ba s The Essence of Eloquence Dzong Ka ba 1357 1419 is generally regarded as one of the greatest Tibetan philosophers and his Mind Only discourse on emptiness is considered a landmark in Buddhist philosophy In Volume I Emptiness in the Mind Only School of Buddhism Hopkins provided a translation of the introduction and the section on the Mind Only School in The Essence of Eloquence The present volume places this enigmatic and influential exposition in its historical and philosophical contexts Reflections on Reality conveys the intellectual vibrancy of the different cultural interpretations of this text and expands the key philosophical issues it addresses Hopkins one of the leading scholarly voices in Tibetan studies begins this volume with two introductory chapters contextualizing Tibetan scholarship in general He then goes on to discuss in detail the religious significance of the central topic of the three natures in the Mind Only School He also considers various views on the status of reality including the doctrine of other emptiness promulgated by the fourteenth century Jo nang savant Shay rap gyel tsen Presenting accurate and insightful translations of a large amount of material that has never been available in English before he shows how these topics have been debated among scholars in Tibet over six centuries Comparing these with presentations in Europe Japan and the United States today he created a lively conversation between normally disparate voices

State of Nature, Stages of Society Frank Palmeri, 2016-03-29 Frank Palmeri sees the conjectural histories of Rousseau Hume Herder and other Enlightenment philosophers as a template for the development of the social sciences in the nineteenth and early twentieth centuries Without documents or memorials these thinkers he argues employed conjecture to formulate a naturalistic account of society s commercial and secular progression Palmeri finds evidence of speculative frameworks in the political economy of Malthus Martineau Mill and Marx He traces the influence of speculative thought in the development of anthropology and ethnography in the 1860s the foundational sociology of Comte and Spencer and the sociology of religion pioneered by Weber Durkheim and Freud Conjectural histories reveal a surprising ambivalence toward progress modernity and secularization among leading thinkers of the time an attitude that affected texts as varied as Darwin s Descent of Man Nietzsche s Genealogy of Morality and the novels of Walter Scott George Eliot and H G Wells Establishing the critical value of conjectural thinking in the study of modern forms of knowledge Palmeri concludes his investigation with its return in the work of Foucault and in recent histories on early religion political organization and material life

Adorno on Nature Deborah Cook, 2014-09-11 Decades before the environmental movement emerged in the 1960s Adorno condemned our destructive and self destructive relationship to the natural world warning of the catastrophe that may result if we continue to treat nature as an object that exists exclusively for our own benefit Adorno on Nature presents the first detailed examination of the pivotal role of the idea of natural history in Adorno s work A comparison of Adorno s concerns with those of key ecological theorists social ecologist Murray Bookchin ecofeminist Carolyn Merchant and deep ecologist Arne Naess reveals how Adorno speaks directly to many of today s most pressing environmental issues Ending with a discussion of the philosophical conundrum of unity in diversity Adorno on Nature also explores how social solidarity can be promoted as a necessary means of confronting environmental problems

Responding To the Screen Jennings Bryant, Dolf Zillmann, 2013-11-05 This volume takes the next step in the evolution of mass communication research tradition from effects to processes a more detailed and microanalytical analysis of the psychological processes involved in receiving and reacting to electronic media messages This domain includes investigations into those psychological processes that occur between the process of selecting media messages for consumption and assessments of whatever processes mediate the long term impact such message consumption may have on consumers subsequent behavior The editors strive to further understanding of some of the basic processes underlying the ways we gain entertainment and information

The Restorative Nature of Ongoing Connections with the Deceased Laurie A. Burke, Edward (Ted) Rynearson, 2022-03-31 The Restorative Nature of Ongoing Connections with the Deceased is a guide to stimulating thought and discussion about ongoing attachments between bereaved individuals and

their deceased loved ones Chapters promote broad inclusive training and dialogue for working with clients who establish and or maintain a restorative connection with their deceased loved one as well as those who find aspects of such connections to be psychologically or spiritually problematic or troublesome Bereavement professionals will come away from this book with a better understanding and a deeper skillset for helping clients to develop continuing bonds *Nature for Sale* Giovanna Ricoveri,2013-06-20 Uncovering the rich heritage of common ownership which existed before the dominance of capitalist property relations Giovanna Ricoveri argues that the subsistence commons of the past can be reinvented today to provide an alternative to the current destructive economic order Ricoveri outlines the distinct features of common ownership as it has existed in history through cooperatives sustainable use of natural resources and direct democracy In doing so she shows how it is possible to provide goods and services which are not commodities exchanged on the capitalistic market something still demonstrated today in village communities across the global South Tracing the erosion of the commons from the European enclosures at the dawn of the Industrial Revolution to the new enclosures of modern capitalism the book concludes by arguing that a new commons is needed today It will be essential reading for activists as well as students and academics in history politics economics and development studies Hegel, Heidegger, and the Quest for the "I" Paolo Diego Bubbio,2024-06-14 This thought provoking study explores the philosophical resources provided by Hegel and Heidegger to grasp the nature of the I and combines those resources in a theoretical analysis of I hood in its connection with nature and history experience and myth The I has a fleeting almost elusive character in the philosophies of Hegel and Heidegger Yet both philosophers strive to make sense of what it means to be an I Their respective theories though seemingly divergent offer remarkable insights into the nature of the I and its relationship to the world Through meticulous examination this book explores the parallel journeys of Hegel and Heidegger tracing their respective paths towards a comprehensive conception of identity beyond the subject object dichotomy Moreover this study goes beyond being an exploration of Hegel s and Heidegger s conceptions of the self by actively employing their insights to chart a path towards a novel understanding of I hood Hegel Heidegger and the Quest for the I will be of interest to scholars and advanced students working on Hegel Heidegger history of European philosophy and contemporary theories of subjectivity and personal identity Offering a fresh perspective on the work of these two seminal thinkers the book contributes to the ongoing dialogue on the nature of the self and its place in the world **Nature and art [ed. by F.B. Ward].** Francis Beckford Ward,1866 **The Nature and Impacts of Noncompliance** Edvaldo Moita,2023-06-29 Over 2 billion people 61% of the world s employed population work in the informal economy Due to its pervasiveness informality plays a major role in understanding a wide swath of ideas such as development work employment governance and growth Its scope nonetheless goes far beyond economic definitions and political agendas As the book argues at the root of informality lies another comprehensive yet generally unnoticed or at best improperly treated phenomenon that of noncompliance with the law Whilst it is true that much attention has been paid to the

economic aspect over the past 5 decades the same cannot be said about the legal aspect which is one of its constitutive features This book takes the first steps in this direction The book provides an account of the phenomenon's legal nature through the lens of a case study on street vendors in Brazil focusing on what can be conceived as noncompliance and by which forms noncompliant behaviour can be assessed It goes on to set out the most striking impacts of noncompliance specifically what happens with the legal system when noncompliance becomes pervasive The Nature and Impacts of Noncompliance was awarded The European Award for Legal Theory 2022 from the European Academy of Legal Theory EALT Premio Abrafi de Teses 2022 from the Brazilian Association for Philosophy of Law and Sociology of Law Abrafi and the 2024 RCSL ISA Adam Podgórski Prize

Against Nature J.-K. Huysmans, 2011-02-19 Against Nature is Huysmans's great fin de siècle novel anticipating many of the strains of modernism in its appreciation of Baudelaire Moreau Redon Mallarmé and Poe It will be the biggest fiasco of the year but I don't care a damn It will be something nobody has ever done before and I shall have said what I had to say As J K Huysmans announced in 1884 Against Nature was fated to be a novel like no other The hero des Esseintes is a neurasthenic aristocrat who has turned his back on the vulgarity of modern life and retreated to an isolated country villa Here accompanied only by a couple of silent servants he pursues his obsessions with exotic flowers rare gems and complex perfumes and embarks on a series of increasingly strange aesthetic experiments starting with the decision to give his giant pet tortoise a jewel encrusted shell Huysmans' study of obsession and aesthetics got up no end of reviewers' noses on its 1884 publication It's not hard to see why decadent aristocrat Jean Floressas des Esseintes afflicted by nerves so grievous they cause his spine to freeze when he sees a servant wringing out washing takes turns kicking out at classical poets modern novelists and the church The poor are grotesque the rich are decaying and the bourgeoisie simply insufferable Only Dickens Baudelaire and the odd enema provide respite Cloistered in an opulent house in the suburbs of Paris Des Esseintes undertakes a series of experiments in living which prove to be an absolute hoot He decorates an unfortunate tortoise with precious stones tries to go to England but only makes it as far as a nearby pub and attempts to turn an urchin into a killer by buying him credit at a brothel This largely plotless mix of bilious satire broad comedy and literary criticism may have lost some of its immediacy but it remains a captivating contradictory work of art James Smart in The Guardian

Designs on Nature Sheila Jasanoff, 2011-06-27 Biology and politics have converged today across much of the industrialized world Debates about genetically modified organisms cloning stem cells animal patenting and new reproductive technologies crowd media headlines and policy agendas Less noticed but no less important are the rifts that have appeared among leading Western nations about the right way to govern innovation in genetics and biotechnology These significant differences in law and policy and in ethical analysis may in a globalizing world act as obstacles to free trade scientific inquiry and shared understandings of human dignity In this magisterial look at some twenty five years of scientific and social development Sheila Jasanoff compares the politics and policy of the life sciences in Britain Germany the United States and in

the European Union as a whole She shows how public and private actors in each setting evaluated new manifestations of biotechnology and tried to reassure themselves about their safety Three main themes emerge First core concepts of democratic theory such as citizenship deliberation and accountability cannot be understood satisfactorily without taking on board the politics of science and technology Second in all three countries policies for the life sciences have been incorporated into nation building projects that seek to reimagine what the nation stands for Third political culture influences democratic politics and it works through the institutionalized ways in which citizens understand and evaluate public knowledge These three aspects of contemporary politics Jasanoff argues help account not only for policy divergences but also for the perceived legitimacy of state actions

The Inheritors and The Nature of a Crime Joseph Conrad, 2022-02-03 This volume offers scholars the first authoritative text of two works produced collaboratively by two of the most important modern British novelists Long hard to obtain and frequently neglected by critics each can now be appreciated both in its own right and as part of the two authors individual oeuvres This scholarly edition situates both works in the context of the writers meeting and ongoing collaboration providing illuminating literary and historical references and detailing the works composition history and reception in the UK and America As well as establishing definitive texts of both works and of the authors prefaces written for the 1924 republication of *The Nature of a Crime* this edition also includes Ford's own 1924 account of his collaboration with Conrad on *The Inheritors* as well as the text of Ford's *The Old Story* a hitherto unpublished early draft of the basic plot of *The Nature of a Crime*

The Nature and Essence of Economic Theory Joseph A. Schumpeter, 2017-09-08 Joseph A Schumpeter was a monumental figure in the history and development of economics This work brings together his brilliant lectures delivered more than a century ago in its first English language paperback edition Here readers will discover Schumpeter's search for an economic science devoid of moral or political dogma *The Nature and Essence of Economic Theory* works out what people should think of pure economics what its nature is what its methods and findings are and where thought takes off from there The book shows the limitations and weaknesses of nineteenth century economics and how the field could be and was improved by establishing a fundamental differentiation between statistics and dynamics To convey his arguments Schumpeter uses certain axioms that form a consistent self contained system and show how sound economic science is based on facts and events rather than presuppositions or definitions Schumpeter's larger aim beyond a pedagogic tool was to deduce changes in the market trade and exchange of goods and services He defined the task of economy as the description of the system and its change tendencies If that can be achieved unequivocally without resorting to doctrine or dogma then the field can be considered self contained

The Nature and Types of Sociological Theory Don Martindale, 2013-11-05 First Published in 1998 This is Volume XI of twenty two in a series on Social Theory and Methodology Notions are widespread that sociological theory is either an industrious activity on the drawing boards of the architects of fantasy or a branch of esoterics operating in a shadowy realm of semi darkness The present study holds neither

of these conceptions of sociological The present study s function is to illuminate the difference between one theory and another The power and reliability of a theory are not always evident all at once A theory may have a power to explain what was not originally anticipated it may also disclose the existence of problems it cannot explain **Nature and Nurture in French Social Sciences, 1859-1914 and Beyond** Martin S. Staum,2011-10-07 The prevailing assumption has been that French ethnographers highlighted the cultural and social environment while anthropologists emphasized the scientific study of head and body shapes Martin Staum shows that the temptation to gravitate towards one pole of the nature nurture continuum often resulted in reluctant concessions to the other side Psychologists Th odule Ribot and Alfred Binet for example were forced to recognize the importance of social factors Non Durkheimian sociologists were divided on the issue of race and gender as progressive and tolerant attitudes on race did not necessarily correlate with flexible attitudes on gender Recognizing this allows Staum to raise questions about the theory of the equivalence of all marginalized groups Anthropological institutions re organized before the First World War sometimes showed decreasing confidence in racial theory but failed to abandon it completely Staum s chilling epilogue discusses how the persistent legacy of such theories was used by extremist anthropologists outside the mainstream to deploy racial ideology as a basis of persecution in the Vichy era
