 - 1) **Identify** – The original vision and guiding philosophy is the only valid way to create your culture (process) (this language is correct)
 - 2) **Measure** – How do you determine if you are on the right or left of the path(s)? (this language may also be acceptable, but the phrase is less of a process and more of a goal)

This system is designed to capture the essential (200–2000 Å) covered range, the one intended to capture the early to late optical portion. This configuration distinguishes the wide range of wavelengths in any spectrum. The wide spectral coverage can be useful in the detection of the full spectrum of an object being monitored by a wide band. When the system is used in the visible range, the light is filtered so that only the visible range is captured. The system is designed to be used in the visible range, but it can be used in the infrared range as well.
