

Essay #2: Observation

The observation essay is “an essay that draws on the writer’s observations of people, places, and/or events to support the writer’s claims about what these observations mean.” — *Student Guidelines*

Preparation

This preparation for writing this essay is a two-tier assignment. **First**, you will closely observe another person as they use an alternative literacy in the environment that they would be most likely to use this literacy (e.g., a gamer at home, playing his game system; a cheerleader at practice, interacting with other cheerleaders and learning routines; a waitress at work in a restaurant) **Second**, after your observation, you are to interview that person about the impact of that type of literacy in their lives. You want to consider how they use it (e.g., work? hobby? family? friends?), how long they’ve used it, its personal value, if it has helped them become more proficient in academic literacy, and if so, how.

Writing

In your essay, you should detail who, what, and where you observed and incorporate what you feel are the most interesting/important parts of your interview. You should not include everything your subject says. **Your thesis should tell me the importance of this alternative literacy in this person’s life, whether it has helped them with academic reading and writing or otherwise, and the rest of your paper should support this assertion based on what you saw and heard from the subject.** You should make a point, not just give a play-by-play of your observations. Use what you learned about yourself and your own familiar literacy through Essay #1 to provide a framework for examining someone else’s alternative literacy.

Format

This essay should be 3-4 double-spaced pages and include a title. Use 12-point Times New Roman font and one-inch margins.

HIV AIDS has been named the Sub Saharan disease In countries that have achieved significant declines in HIV prevalence young people have registered the biggest behavioural changes It means they hold the keys not only to our understanding of the epidemic but more importantly to the efforts required to stem the tide of infections However the majority of young people are ignorant of how to prevent transmission have low compliance to condom use which is in some cases accentuated by misconceptions about HIV AIDS transmission and have insufficient knowledge regarding transmission and avoidance behaviours As such consensus on feasible preventive interventions target young people particularly those in schools It is on this premise that the book unlocks the key pillars in effective HIV AIDS education policies and practices The study has drawn upon the experiences of selected Urban Schools in Malawi to explore the needs of young people in classroom the extent to which the classroom practices respond to the needs and the factors influencing these using questionnaires interviews lesson observations and document analysis Malawi typically represents most Sub Saharan African countries in terms of challenges faced by education systems Given the similar cultural settings of the people of Sub Saharan Africa the findings and recommendations of the study generalises to the education systems of Sub Saharan Africa to a greater extent The book shows the need for open discussion climates on HIV AIDS issues despite a conservative cultural and religious adult world that is not open It has also identified a need for explicit and accurate knowledge on HIV AIDS issues opportunities to acquire behavioural skills for HIV prevention and involvement of external speakers in classroom HIV AIDS education Current classroom practice does not address the pupils needs adequately Factors influencing this can be linked to lack of policies responsive to culture and religion ineffective and inadequate teaching policy guidelines and lack of a policy prioritising HIV AIDS education The findings suggest that in future effective HIV AIDS Education needs to be informed by the pupils needs To address these needs support from the wider society and related policies coupled with appropriate management and classroom practice will be required The book is therefore an indispensable tool for education systems in Sub Saharan Africa It provides an effective model for the development of effective HIV AIDS policies and practices in HIV AIDS education curricula
