

Economics Research Papers

When I read economics research papers, I look for the author's ability to motivate an interesting question using economic logic, critically analyze the past literature, and recognize empirical problems as they arise. Your research paper should also highlight a central novelty related to existing economics research. Your research paper should demonstrate that you are more knowledgeable in your analysis of applied macroeconomics issues than a witty editorial writer for The New York Times. To this end, you should present evidence, cite literature, explain economic trade-offs, and approach your central thesis from an analytic perspective. Students are occasionally tempted to write an opinion piece or adopt a tone that resembles journalistic writing. This is not the purpose of economics research papers!

Teaching economics writing is an essential aspect of communicating good economics research well. You will get a lower grade if your writing is:

- ungrammatical
- unclear
- journalistic

If you have trouble writing grammatically, please leave yourself some extra time to go to a writing tutor at the University's Writing Resource Center. Clarity takes priority when writing about economics. Do not worry about sounding sharp if your writing is clear.

Economists have a particular writing style that is useful to learn if you want to be taken seriously by other economists. Below are some of the essential features of the "economics style." The desirable tone and writing style are exemplified in some of the peer-reviewed papers listed on the syllabus. Some of the stylistic features may seem arbitrary, but you should follow them anyway

- Favor the present tense. For instance: "Mullainathan (2000) finds that..." or "In this paper, I attempt to..."
- Use formal in-text citations for books and articles. Do not describe them in your writing
 - Write: "Mullainathan (2000) finds that..."
 - Do not write: "Sendhil Mullainathan, in a 2006 journal article..."
- Use the active voice. Do NOT use the passive voice. The active voice is a more efficient use of language, and it is much easier to read. Make sure the subject of the sentence is the one doing the action of the verb(s) of the sentence and avoid any unnecessary use of the verb "to be." For example:
 - Write: "I collected data..."
 - Do not write: "Data was collected..."
- Direct and simple sentences are the most effective ways to deliver a message.
- Use "I" when you mean "I" and use "we" when you mean "we."
 - Personal pronouns (I, we, she/he, them, etc.) are acceptable in economics papers.
 - For instance, you might use "we" to talk about something that everyone could be expected to appreciate: "We expect that highly selective colleges enroll few students who had low grades in secondary school."
 - Use "I" to talk about what you specifically did: "I use data from..."
