Tomaz Humar Bernadette McDonald,2010-01-26 In August 2005 Toma Humar was trapped on a narrow ledge at 5900 metres on the formidable Rupal Face of Nanga Parbat He had been attempting a new route directly up the middle of the highest mountain face in the world solo After six days he was out of food almost out of fuel and frequently buried by avalanches Three helicopters were poised for a brief break in the weather to pluck him off the mountain Because of the audacity of the climb the fame of the climber the high risk associated with the rescue and the hourly reports posted on his base camp website the world was watching Would this be the most spectacular rescue in climbing history Or a tragic and very public death in the mountains Years before as communism was collapsing and the Balkans slid into chaos Humar was unceremoniously conscripted into a dirty war that he despised where he observed brutal and inhumane atrocities that disgusted him Finally he did the unthinkable he left and finally arrived home in what had become a new country Slovenia He returned to climbing and within very few years he was among the best in the world Reinhold Messner among others called him the most remarkable mountain climber of his generation His routes are seldom repeated most consider them to be suicidal yet he often climbs them solo As this book was being written he achieved the first ever solo ascent of the east summit of Annapurna Toma Humar has cooperated with Bernadette McDonald the distinguished former director of the Banff Festival and author of several books on mountaineering to tell his utterly remarkable story **The Ends of the Earth** Elizabeth Kolbert,Francis Spufford,2011-01-01 An innovatively packaged literary anthology published to commemorate the International Polar Year and remind us what we re in danger of losing The Arctic and Antarctic ice shelves have been an object of obsession for as long as we ve known they existed Countless explorers such as Richard Byrd Ernest Shackleton and Robert Falcon Scott have risked their lives to chart their frozen landscapes Now for the first time in human history we are in legitimate danger of seeing polar ice dramatically shrink break apart or even disappear The Ends of the Earth a collection of the very best writing on the Arctic and Antarctic will simultaneously commemorate four centuries of exploring and scientific study and make the call for preservation Stocked with first person narratives cultural histories nature and science writing and fiction this book is a compendium of the greats of their fields including legendary polar explorers and such writers as Jon Krakauer Jack London Diane Ackerman Barry Lopez and Ursula K LeGuin Edited by two contemporary authorities on exploring and the environment and published to coincide with the International Polar Year The Ends of the Earth is a memorable collection of terrific writing and a lasting contribution to the debate over global warming and the future of the polar regions themselves *Chilton Ford Service Manual* ,2004 Lone Rider Elspeth Beard,2017-07-06 In 1982 at the age of just twenty three Elspeth Beard left behind her family and friends in London and set off on a 35 000 mile solo adventure around the world on her motorbike This is the story of a unique and life changing adventure **Gemini 5** David J. Shayler,2023-03-07 This third book of the Gemini mission series focuses on the flight that simulated in Earth orbit the

duration of an eight day Apollo mission to the Moon After the proof of concept test flights Gemini 1 2 and 3 as described in GEMINI FLIES and the success of the first American EVA as well as the four day U S mission GEMINI 4 NASA gained the confidence to gradually increase mission time spent in orbit This is the first known book to focus solely on the Gemini 5 mission and its challenges with equipment failures and difficult living conditions The mission was targeted to double the endurance of the previous one and as such was an integral stepping stone for an even more audacious mission four months later Attempting the eight and then fourteen day durations would be an opportunity for America to gain the lead in space exploration over the Soviets This mission pioneered the duration of a flight to the Moon and back three years before Apollo 8 made that journey without a lunar landing for the first time *S.S.
