13. What is **transmission** in a computer network? *Transfer of data between two or more devices in a network.*
14. Define **network topology** and list its types. *Network topology refers to the arrangement of nodes and links in a network. Types include bus, star, ring, mesh, and hybrid.*
15. What is **bandwidth** in a network? *Bandwidth is the maximum rate at which data can be transferred over a network connection.*
16. What is **latency** in a network? *Latency is the time delay between the sending and receiving of data over a network.*
17. What is **throughput** in a network? *Throughput is the actual amount of data that is successfully transferred over a network.*
18. What is **packet size** in a network? *Packet size is the amount of data contained in a single packet for transmission over a network.*
19. What is **protocol** in a network? *A protocol is a set of rules and conventions that govern the communication between devices in a network.*
20. What is **IP address** in a network? *An IP address is a unique numerical label assigned to each device connected to a network, used for identifying and locating the device.*
