Building a Website: Understanding the Basics of HTML and CSS

1. Introduction to HTML and CSS

Web design is the process of creating a website that is both visually appealing and functional. It involves a combination of design, programming, and content creation. In this course, you will learn the basics of HTML and CSS, which are the foundation of web design.

HTML (Hypertext Markup Language) is a markup language that is used to create the structure of a website. It is a text-based language that uses tags to define the elements of a document. CSS (Cascading Style Sheets) is a style sheet language that is used to control the presentation of a document written in HTML. It is a text-based language that uses rules to define the visual appearance of a document.

In this course, you will learn the basics of HTML and CSS, including how to create a simple website, how to use the browser's developer tools, and how to create a responsive design. You will also learn how to use the latest versions of HTML and CSS, and how to create a website that is accessible to all users.

2. Creating a Simple Website

One of the most common tasks in web design is creating a simple website. This can be done using HTML and CSS. In this section, you will learn how to create a simple website using HTML and CSS. You will learn how to create a header, a main content area, and a footer. You will also learn how to create a navigation menu and how to create a form. You will also learn how to use the browser's developer tools to debug your code and how to create a responsive design that works on all devices.
