Corporate Environmental Accountability in International Law Elisa Morgera, 2020. This book explores the evolving role of international law in directing and controlling the conduct of business enterprises in particular multinational corporations with respect to the protection of the environment, the sustainable use of natural resources and the respect of inter-related human rights. It assesses the progress and continuing limitations in the identification of international standards of corporate environmental accountability and responsibility and their implementation by international organizations. This assessment shows the extent to which the international community has conceptually and operationally clarified its expectations about acceptable corporate conduct. This second edition of Elisa Morgera's book reflects the intensified convergence of international standard setting efforts on corporate environmental accountability with parallel international developments on business and human rights and the environment. It also explores the recent emergence of substantive international standards of corporate environmental responsibility which have arisen from a growing number of sectoral guidelines. Equally it points to the remaining divergences in the content of international standards of corporate environmental accountability and responsibility which reflect differing views among States of their international obligations to ensure the protection of the environment and the respect of human rights. A Short Course in International Business Ethics Charles Mitchell, 2009. *Transnational Corruption and Corporations* Dr Simeon Obidairo, 2013-11-28. What are the challenges to the prevention of transnational bribery by multinational corporations in international business transactions? This book examines two particular constraints operating on the regulation of transnational corruption in general and bribery in particular. Firstly it explores the limits of international cooperation in the regulation of transnational corruption and highlights the disparities between the capacities of individual states to pursue adequate regulation. It also considers the role and progress of international bodies such as the OECD and the

response of selected domestic legal systems in tackling the problem Secondly the book examines the liability regime for corporations and again highlights an unexpected shortcoming of multilateral policy in the administration and enforcement of international agreements The book will be of value both to students and researchers with an interest in the regulation of transnational corruption as well as policy makers and practitioners working in this area
