Private International Law and Arbitral Jurisdiction Faidon Varesis, 2022-12-23 International commercial arbitration and litigation are often seen as competing fora fields of law or markets This intersection is at its highest at the forefront of any proceedings at the jurisdictional stage The analysis of jurisdictional issues at the forefront of an arbitration has been confined in a descriptive analysis of the law and jurisprudence dealing with jurisdictional intersections almost in a mechanistic manner These are not however issues which can be treated as mere mechanical rules They are issues pertaining to core notions of authority sovereignty their origins and their allocation At the same time the pragmatic and practical domination of party autonomy is a fact which cannot be disregarded when one considers the normative and theoretical foundations of any model of dealing with these issues This book moves beyond an analysis of arbitration and jurisdiction clauses to reconcile theory and practice and provides an underlying theoretical model to explain and regulate jurisdictional

intersections at the early stages of an arbitration from a private international law perspective It combines both an in depth engagement with the theoretical literature as well as a close examination and analysis of its practical consequences in the form of a restatement of the law of England and Wales From a methodological perspective it utilises contemporary theories in private international law to propose a coherent model of regulating arbitral jurisdictions which promotes autonomy and freedom of the parties at this stage Demonstrating first how the theoretical model can be applied in practice and second to provide a basis for a potential future top down or bottom up approach of adopting the proposed model it includes a succinct and practical codification of the current state of affairs in relation to the whole spectrum of jurisdictional issues in England and Wales to serve as a useful tool for practitioners considering jurisdictional issues both from the perspective of State courts and from the perspective of arbitral tribunals as well as academics researching in these areas

Wheels Stop Rick Houston, 2013-12-01 Humanity s first reusable spacecraft and the most complex machine ever built NASA s Space Shuttle debuted with great promise and as a dependable source of wonder and national pride But with the Challenger catastrophe in 1986 the whole Space Shuttle program came into question as did NASA itself so long an institution that was seemingly above reproach Wheels Stop tells the stirring story of how after the Challenger disaster the Space Shuttle not only recovered but went on to perform its greatest missions From the Return to

Building Big Business in Russia Yuko Adachi, 2013-09-05. This book examines the development of big business in Russia since the onset of market oriented reform in the early 1990s. It explains how privatized post Soviet enterprises, many of which made little sense as business units, were transformed into functional firms able to operate in the environment of a market economy. It provides detailed case studies of three key companies: Yukos Oil Company, Siberian Russian Aluminium and Norilsk Nickel, all of which played a key role in Russia's economic recovery after 1998, describing how these companies were created, run and have developed. It shows how Russian businesses during the 1990s routinely relied on practices not entirely compatible with formal rules, in particular in the area of corporate governance. The book fully explores the critical role played by informal corporate governance practices such as share dilution, transfer pricing, asset stripping, limiting shareholders' access to votes and bankruptcy to order, as Russian big business developed during the 1990s. Unlike other studies on Russian corporate governance, this book highlights the ambiguous impact of informal corporate governance practices on the companies involved as commercial entities and suggests that although their use proved costly to Russia's business reputation, they helped core groups of owners/managers at the time to establish coherent business firms. Overall, the book shows that we cannot understand the nature of current economic changes in Russia without recognising the crucial role played by informal corporate governance practices in the creation and development of big business in post Soviet Russia.

Transforming Asian Cities Nihal Perera, Wing-shing Tang, 2013. While there is no lack of studies on Asian cities, the majority focus on financial districts, poverty, the slum, tradition, tourism and pollution and use the modern affluent and transforming Western city as the reference point. This vast Asian empirical presence is not complemented by a theoretical presence; academic discourses overlook common and basic urban processes, particularly the production of space, place and identity by ordinary citizens. Switching the vantage point to Asian cities and citizens, *Transforming Asian Cities* draws attention to how Asians produce their contemporary urban practices, identities and spaces as part of resisting, responding to and avoiding larger global and national processes. Instead of viewing

Asian cities in opposition to the Western city and using it as the norm this book instead opts to provincialize mainstream and traditional knowledge. It argues that the vast terrain of ordinary actors and spaces which are currently left out should be reflected in academic debates and policy decisions and the local thinking processes that constitute these spaces need to be acknowledged, enabled and critiqued. The individual chapters illustrate that global spaces are more trans local, traditional environments are more modern and Asian spaces are better defined than acknowledged. The aim is to develop room for understandings of Asian cities from Asian standpoints, especially acknowledging how Asians observe, interpret, understand and create space in their cities.
