

NYS LAB: Relationships and Biodiversity

A Laboratory Activity for the Living Environment

Introduction:

Monarda mollis is a native plant species of grasslands. **2006** is considered good for studying various parts of nature. Considered for protection and restoration. *Monarda mollis* grows very slowly, which is the challenge of growing this native plant in grasslands. Consider for long-term restoration.

Species that are most closely related to *Monarda mollis* are most likely to grow in the important habitats. Consider. These native plant species that are growing in the habitat may be related to *Monarda mollis*. You will learn about this relationship.

- get a **relationship and ecological relationship** to determine which plant species are most closely related to the important species, *Monarda mollis*.
- use this evidence to decide which plant species to study for conservation of the important habitats. Consider.

Pre-Lab

Using the information from the previous introduction, explain the problems we are trying to solve in this lab and how we are going to solve it.
