Papadimitriou, Djuro Macut, George Mastorakos, Constantine A. Stratakis, Nikos Vlahos, 2024-12-02 Pediatric adolescent endocrinology and gynecology are entering a new era Whole exome sequencing approaches with targeted gene panels have become widely available even for prenatal screening leading to the elucidation of genetic etiologies in endocrine and gynecological diseases and opening the road for genetic precision medicine and the development of specific therapies The transition from the end of puberty to the attainment of an adult phenotype may be a very long way up to 10 years or even longer Meanwhile conventional approaches to hormone deficiencies are rapidly changing as are the options for treatment of sexual precocity and infertility Commercially available rLH rFSH preparations in the form of pens used mainly for fertility induction in women are now being investigated in hypogonadotropic hypogonadism aiming to a physiological replacement therapy not only at puberty but also to the replacement of the missing mini puberty crucially important for fertility and the very essence of the male sex identity itself Furthermore they provide an alternative to surgery especially for bilateral cryptorchidism preserving future fertility Total Socioenvironmental Systems Yichun Xie, 2023-10-13 This book presents a new analytical framework and several newly developed quantitative methods to investigate the interactions between climatic ecological and socioeconomic factors as a total socioenvironmental system TSES Facing the increasingly imperiled ecosystems around the world understanding the complex relationships between humans and environments is of utmost importance This book offers several solutions to these challenges based on the author's research and illustrates them with case studies and annotated data sets It develops the conceptual framework of a TSES emphasizing the identification of causal relationships as a starting point to investigating the interactions between biophysical phenomena and socioeconomic factors The book experiments with various spatial data assimilation techniques such as GIS for matching diverged areal units over which biophysical and socioeconomic datasets are collected Trend extraction methods

including machine learning for synchronizing distinct temporal rhythms hidden in biophysical and socioeconomic phenomena to augment their causal relationships are explored as well The book also examines sustainability in urban systems social systems and ecosystems This volume will be useful to readers across many disciplines including but not limited to geographic information science ecological informatics environmental informatics regional and urban modeling quantitative social sciences and planning
