DESCRIPTION

The model TC35 cone-type high-frequency driver was designed in response to the demand for a tweeter with efficiency rating and dimensions compatible with compact loudspeaker systems. The TC35 exhibits a number of quality features which clearly set it apart from other small diameter loudspeakers and identify it as a fine quality reproducer.

The hallmark of any truly fine loudspeaker is a die-cast, rather than a stamped or drawn, frame. The TC35 is constructed in a high-pressure die-cast chassis. Jewel-like precision in final machining and assembly maintains absolute accuracy in positioning the all-important magnetic structure and moving assembly. The voice coil is formed of a double layer of silver-plated aluminum wire. This provides an excellent combination of low mass, excellent electrical conductivity and high efficiency. The voice coil is assembled directly to the one-piece cone and dome assembly, eliminating the necessity of a separate coil form, thus further reducing moving mass. The cone itself is suspended on a layer of polyurethane foam which provides optimum compliance and cone damping for smooth response throughout the very-high-frequency range.

The deluxe features and superb listening quality of the TC35 make it an ideal high-frequency driver for use in new systems or as an addition to existing ones. The solid-backed frame of the TC35 permits its use in the same enclosure used for other loudspeakers in the system, without the necessity for a separate, isolated compartment.
