technology there are some research directions and challenges which are at the forefront of world wide research activities because of their relevance This relevance may be related to different aspects First from a point of view of researchers it can

be implied by just an analytic or algorithmic difficulty in the solution of problems within an area From a broader perspective this relevance can be related to how important problems and challenges in a particular area are to society corporate or national competitiveness etc Needless to say that the latter more global challenges are probably more decisive a driving force for science seen from a global perspective One of such meta challenges in the present world is that of intelligent systems For a long time it has been obvious that the complexity of our world and the speed of changes we face in virtually all processes that have impact on our life imply a need to automate many tasks and processes that have been so far limited to human beings because they require some sort of intelligence
