employed for the post buckling analysis of two and three dimensional structures Chapter 5 addresses the non linear behaviour and modelling of semi rigid connections while several numerical functions for description of moment versus rotation curves of typical connection types are introduced The scope of the work in chapter 6 covers semi rigid connections and material yielding to the static analysis of steel frames Chapter 7 studies the cyclic response of steel frames with semi rigid joints and elastic material characteristics In the last chapter the combined effects of semi rigid connections and plastic hinges on steel frames under time dependent loads are studied using a simple springs in series model For computational effectiveness and efficiency the concentrated plastic hinge concept is used throughout these studies
