be tailored to each patient's needs it must comply with the medical protocol and it must engage the patient to perform the expected exercises/activities. In order to achieve such objectives, interaction technologies offer a wider range of solutions every year, more versatile, more impactful. In this context, robots and digital systems constitute groundbreaking opportunities for innovation in rehabilitation, especially through their adoption of artificial intelligence technologies. For instance, they can work as theranostic machines by means of their capability of collecting and analysing valuable data through this they can evaluate the rehabilitation outcome, improve diagnostic processes and offer new insights on clinical conditions and methodologies while they guide the person in training and re-training procedures.

Unmanned Aerial Remote Sensing
David R. Green, 2020-07-10
Unmanned Aircraft Systems (UAS) are a rapidly evolving technology with an expanding array of diverse applications. In response to the continuing evolution of this technology, this book discusses unmanned aerial vehicles (UAVs) and similar systems, platforms and sensors, as well as exploring some of their environmental applications. It explains how they can be used for mapping, monitoring and modeling a wide variety of different environmental aspects and at the same time addresses some of the current constraints placed on realizing the potential use of the technology, such as its flight duration and distance, safety and the invasion of privacy, etc. Features of the book: Provides necessary theoretical foundations for pertinent subject matter areas; Introduces the role and value of UAVs for geographical data acquisition and the ways to acquire and process the data; Provides a synthesis of ongoing research and a focus on the use of technology for small-scale image and spatial data acquisition in an environmental context. Written by experts of the technology who bring together UAS tools and resources for the environmental specialist. *Unmanned Aerial Remote Sensing: UAS for Environmental Applications* is an excellent resource for any practitioner utilizing remote sensing and other geospatial technologies for environmental applications such as conservation research and planning. Students and academics in information science, environment and natural resources, geosciences and geography will likewise find this comprehensive book a useful and informative resource.

The Social Construction of Landscapes in Games Dennis Edler, Olaf Kühne, Corinna Jenal, 2022-06-25
The book is dedicated to a compilation of diverse and creative landscapes which occur in games. Being part of a game setting, these landscapes trigger social construction processes in specific ways. A selection of twenty-four research articles addresses the social constructions of landscapes represented in analogue, digital and hybrid game formats, as well as their theoretical framing and future perspectives.

Design and Debris Joseph Conte, 2002-04-24
Design and Debris discusses the relationship between order and disorder in the works of John Hawkes, Harry Mathews, John Barth, Gilbert Sorrentino, Robert Coover, Thomas Pynchon, Kathy Acker and Don DeLillo. In analyzing their work, Joseph Conte brings to bear a unique approach adapted from scientific thought, chaos theory. His chief concern is illuminating those works whose narrative structures locate order hidden in disorder, whose authors Conte terms proceduralists, and those whose structures reflect the opposite, disorder emerging from states of order, whose authors Conte calls disruptors. Documenting the paradigm shift from modernism in

which artists attempted to impose order on a disordered world to postmodernism in which the artist portrays the process of orderly disorder Conte shows how the shift has led to postmodern artists embrace of science in their treatment of complex ideas Detailing how chaos theory interpenetrates disciplines as varied as economics politics biology and cognitive science he suggests a second paradigm shift from modernist specialization to postmodern pluralism In such a pluralistic world the novel is freed from the purely literar A Cumulated Index to the Books of ... ,1901 The United States Catalog ,1904
