WP 31S User's Manual Walter Bonin,2014-12-11 This manual documents WP 31S a free software you can use for converting an HP 20b or HP 30b financial calculator of Hewlett Packard into a clean and compact scientific and engineering

problem solver WP 31S is a derivative of the WP 34S being on the market since 2011. It was designed to be the entry model of the family of WP RPN calculators. Firmware and user interface of WP 31S were thoroughly designed, written and tested by us, creating a new straight and compact technical problem solver that fits comfortably in your shirt pocket. It readily offers you a complete set of mathematical functions for solving engineering and scientific problems, a full fledged UNDO for the first time ever on an RPN pocket calculator, an ample set of statistical operations including curve fitting and forecasting probability distributions like Gaussian, Fisher's F, Student's t, chi square, Poisson, binomial, Weibull, and more, over 50 fundamental physical constants as accurate as they are used today by national standards institutes such as NIST or PTB, plus a selection of important constants from mathematics, astronomy and surveying, over 80 unit conversions, most of them from old British Imperial to universal SI units and vice versa, battery fail safe on board backup memory for your data. Furthermore, your WP 31S provides ample space for your calculations, a choice of 4 or 8 stack levels, 4 for compatibility with vintage HP calculators, 8 for absolutely worry free computing of even the most complex formulas, you will ever meet, up to 17 general purpose registers for permanently storing your data and 14 dedicated statistics registers for whatever you want to accumulate. WP 31S is optimized for manual problem solving, it shows a very clean layout so you find all you need at first view easily. Nevertheless, it offers you over 340 functions, this compact 150 page manual explains all of them. It includes many pictures and examples, everything you want to know, also about creating, flashing and updating your WP 31S. Recommended for any serious science or engineering student as well as for professionals in these areas.

WP 34S Owner's Manual Walter Bonin, 2013-02-23. This manual documents WP 34S, a free software converting Hewlett Packard's HP 30b Business Professional into a fast full fledged scientific programmable calculator like you have never had before, providing all the functions you ever wished having handy and comfortably fitting into your shirt pocket. The function set of WP 34S is based on the famous HP 42S RPN Scientific, the most powerful programmable RPN calculator industrially built so far. Additionally, we put in the functions of the HP 16C, the HP 32SII and the HP 21S. Furthermore, we added numerous useful functions for mathematics, statistics, physics, engineering, programming, I/O etc, such as many statistical distributions and their inverses, Euler's Beta and Riemann's Zeta functions, Bernoulli and Fibonacci numbers, Lambert's W, the error function and the Chebyshev, Hermite, Laguerre and Legendre orthogonal polynomials, forget heavy table books, programmable sums and products, first and second derivatives, integer computing in fifteen bases from binary to hexadecimal, bidirectional serial communication with your computer, battery fail safe on board backup memory, 88 conversions, mainly from old Imperial to universal SI units and vice versa, 50 fundamental physical constants, plus a selection of important numbers from mathematics, astronomy and surveying, Greek and extended Latin letters, plus mathematical symbols and a stopwatch based on a real time clock with hardware. Added WP 34S is the first RPN calculator offering you a choice of two stack sizes: traditional 4 stack levels for HP compatibility, 8 levels for convenient calculations in complex domain, advanced real calculus, vector algebra in

4D or for whatever application you have in mind WP 34S features up to 107 global registers 112 global flags up to 928 program steps in RAM up to 6014 program steps in flash memory a 30 byte alpha register 16 local flags as well as up to 144 local registers allowing for recursive programming and 4 user programmable hotkeys Most of the memory layout is conveniently settable by you This 244 page manual explains all the over 700 functions of your WP 34S It includes a wealth of information many pictures and examples everything you want to know also about flashing updating and tuning your WP 34S This is the true and original WP 34S reference written by one of the two initiators of this project Recommended for any serious science or engineering student as well as for professionals in these areas **HP-27S Scientific Calculator**
