How to Survive Your Freshman Year Frances Northcutt,2013 Now revised and updated this guide offers incoming college freshmen the experience advice and wisdom of their peers hundreds of other students who have survived their first year of college and have something interesting to say about it

Text Structures From the Masters Gretchen Bernabei,Jennifer Koppe,2016-01-29 Gretchen Bernabei asks students to derive possible text structures from examining mentor texts Instead of that one format students are given the five paragraph essay she gives us fifty and doesn t pretend that s a complete list She changes the landscape students can work in from one of poverty to one of wonderful excess She shows us that as writers we are playing a game with lots of moves Thomas Newkirk School writing has nothing to do with my life If that sounds like your students then you need this book because it will prove to your students that writing counts in our world and always has In Text Structures from the Masters Gretchen Bernabei and Jennifer Koppe provide 50 short texts by famous Americans who put pen to paper driven by what Peter Elbow described as an itch to say something The book includes Sojourner Truth s Speech itch join a heated debate FDR s Pearl Harbor message itch pick up

the pieces JFK's inaugural address it gives a pep talk along with 47 more pieces and their explicit purposes. By examining the structure of these mentor texts, students suddenly see that the itch is something they have in their own lives too. And the 50 companion lessons invite students to use the text structure of each of the famous documents to express that itch. Each 4-page lesson includes a planning sheet that reveals the structure of the mentor text, giving students an X-Ray like device for looking at the piece of writing. Brainstorming boxes that invite students to discover their itchiest topic. A method for kernelizing their own essay making an outline of what they will write using the text structure as a guide. Student examples of both kernel essays and finished pieces. The bonus: Students report the historical document comes to life as they can see textual map that holds it together and have used that map themselves. Text Structures from the Masters shows students how writing can help get the work of their lives done. They don't need to be poised to send someone into the battlefield to have the desire to express something to others just the itch to say it well. *Cases 'n' Places* Stewart Marshall, Wanjira

Kinuthia, 2010-02-01 Practitioners in the field of educational technology require a high level of problem solving, critical thinking, and interpersonal skills to deal with learning issues that are often complex and multidimensional. Unfortunately, there are few opportunities for providers of learning services and learners to practice authentic instructional design or educational technology as part of their academic preparation and/or training. When learners interact with case studies through reasoning and problem solving, learning takes place through the process of analysis, synthesis, application, and evaluation. In particular, case studies that use story telling to reflect problem situations in real life create an authentic learning environment for learners. This book provides the material that learners can use to interact, reason, and apply their problem solving skills in realistic and engaging cases. Because of the interdisciplinary and multidisciplinary nature of the field and the cases, this book is useful not just in educational technology but also in other fields. A Facilitator Guide is provided for each chapter for teachers and trainers using this book with their learners. **How to Survive the Real World: Life After**

College Graduation Andrea Syrtash, 2009-03-01 After the parties, the frat rushes, the Big Test, and the Big Game, the caffeinated all-nighters, and the pomp and circumstance, life comes knocking. Finding a job and keeping it, renting an apartment or sharing a sublet, dealing with your own money instead of your parents' money, looking for love and looking who knew how complicated the world after college would be. Nearly 800 contributors to this How to Survive book found out and happily share their hard-won insights. This useful, upbeat book collects stories, tips, and advice on finding the best place to live, entering adulthood without losing passion, taking care of one's health, finding a great job, and not going home for the holidays for the first time. Covering both the psychological adjustments and the nuts and bolts of daily life as a grown-up, *How to Survive the Real World* is witty, practical, and the perfect gift for the nervous grad. College Success for Students on the Autism Spectrum S. Jay Kuder, Amy Accardo, John Woodruff, 2023-07-03 Helping both college faculty and student affairs staff enlarge their understanding of the experiences of students on the autism spectrum, this book provides

guidance on putting supports in place to increase college success Uniquely the authors bring the perspective of neurodiversity to this work Many individuals on the autism spectrum have been stigmatized by the diagnosis and experience autism as a negative label that brings with it marginalization and barriers through an emphasis on deficits Autistic self advocates within the neurodiversity movement are leading the charge to rethinking autism as neurodiversity and to celebrating autism as central to identity Neurodiversity is not a theory or a way of being it is a fact and neurological diversity should be valued and respected along with any other human variation such as race ethnicity gender and sexuality The book provides the practical guidance needed to help neurodivergent students succeed with chapters that address a variety of key issues from the transition to college to career readiness after graduation The authors address support services faculty and staff roles and enhancing academic success They also cover navigating the social demands of college life working with families and mental health The final chapter brings it all together describing the elements of a comprehensive program to help this student population succeed Difficulties with social interaction and communication are one of the defining characteristics of autism and often persist into adulthood It can be assumed that difficulties with social interaction and communication may also impact college success both socially and academically But the answer for these students is not necessarily to try to fix these issues since the fact that these students have been admitted to a degree granting program shows that they can be successful students Instead there should be an emphasis on helping faculty staff and students understand the diversity of human behavior while helping autistic students achieve college success through a support system and by providing accommodations and services when needed
