- Select Alarm 1 or 2

13KEY

- Advances display through the various operational modes
- Selects watch in setting mode

14KEY

- Controls timing mode for each function
- Clears Chronograph / Alarm memory

KEY ACTIONS - QUICK PRESS VS. PRESS AND HOLD

There are two key actions used to program the watch:

QUICK PRESS

The key is pressed quickly and immediately released. This is the most common key action used to control most aspects of the watch's operation.

PRESS & HOLD

The key is pressed and held for 3-5 seconds. This key action is generally used to initiate a programming sequence or to change an on-screen set point.

NOTE: Generally when a **PRESS & HOLD** action is required, the word **HOLD** will appear on the screen for a few seconds.

NOTE: In addition, an additional action is required when a **PRESS & HOLD** is required. In most other instances, if not explicitly stated, a **QUICK PRESS** should be assumed.

PROGRAMMING THE WATCH - COMMON KEY ACTIONS

The following are the steps required to perform the most common operations.

ENTER A PROGRAMMING SEQUENCE

PRESS & HOLD the 14 key

The words **ADJUST - HOLD** will appear in the top and bottom lines of the display. Continue to hold the key until the display automatically advances to the first variable in the programming sequence.

ADJUST VARIABLE IN A PROGRAMMING SEQUENCE

QUICK PRESS the 11 & 12 keys

Variables in a programming sequence are adjusted by using **QUICK PRESS** of the 11 key and **QUICK PRESS** of the 12 key.

If more programming options, a **PRESS & HOLD** of either the 11 or 12 key will cause the variable to fast advance allowing you to quickly enter a new or different number.
