academics with managing highway safety research In addition to the report 16 unpublished appendices Appendices A O and R have been made available electronically Publisher description The Art of Regression Modeling in Road Safety Ezra Hauer,2014-12-10 This unique book explains how to fashion useful regression models from commonly available data to erect models essential for evidence based road safety management and research Composed from techniques and best practices presented over many years of lectures and workshops The Art of Regression Modeling in Road Safety illustrates that fruitful modeling cannot be done without substantive knowledge about the modeled phenomenon Class tested in courses and workshops across North America the book is ideal for professionals researchers university professors and graduate students with an interest in or responsibilities related to road safety This book also Presents for the first time a powerful analytical tool for road safety researchers and practitioners Includes problems and solutions in each chapter as well as data and spreadsheets for running models and PowerPoint presentation slides Features pedagogy well suited for graduate courses and workshops including problems solutions and PowerPoint presentations Equips readers to perform all analyses on a spreadsheet without requiring mastery of complex and costly software Emphasizes understanding without esoteric mathematics Makes assumptions visible and explains their role and consequences **Behavioural Adaptation and Road Safety** Christina Rudin-Brown,Samantha Jamson,2013-05-24 Despite being an accepted construct in traffic and transport psychology the precise nature of behavioural adaptation including its causes and consequences has not yet been established within the road safety community A comprehensive collection of recent literature Behavioural Adaptation and Road Safety Theory Evidence and Action explores behavioural adaptation in road users It examines behavioural adaptation within the context of historical and theoretical perspectives and puts forth tangible and practical solutions that can effectively address adverse behavioural adaptation to road safety interventions before it occurs Edited by Christina Rudin Brown and Samantha Jamson with chapters authored by leading road safety experts in driver psychology and behaviour the book introduces the concept of behavioural adaptation and details its more relevant issues It reviews the definition of behavioural adaptation that was put forward by the OECD in 1990 and then puts this definition through its paces identifying where it may be lacking and how it might be improved This sets the context for the remaining chapters which take the OECD definition as their starting points The book discusses the various theories and models of behavioural adaptation and more general theories of driver behaviour developed during the last half century It provides examples of the evidence for behavioural adaptation instances in which behavioural adaptation arose as a consequence of the introduction of safety countermeasures The book then focuses on the internal human element and considers countermeasures that might be used to limit the development of behavioural adaptation in various road user groups The book concludes with practical tools and methodologies to address behavioural adaptation in research and design and to limit the potential negative effects before they happen Supplying easy to understand accessible solutions that can be implemented early on in a road safety intervention s design or conception phase

the chapters represent the most extensive compilation of literature relating to behavioural adaptation and its consequences since the 1990 OECD report. The book brings together earlier theories of behavioural adaptation with more recent theories in the area and combines them with practical advice, methods and tangible solutions that can minimise the potential negative impact of behavioural adaptation on road user safety and address it before it occurs. It is an essential component of any road safety library and should be of particular relevance to researchers, practitioners, designers and policymakers who are interested in maximizing safety while at the same time encouraging innovation and excellence in road transport related design.

2010 Highway Safety Manual Yanfeng Ouyang, Illinois. Department of Transportation. Bureau of Materials and Physical Research, Illinois Center for Transportation, 2012. *Wisconsin State Highway 23, Fond Du Lac to Plymouth, Fond Du Lac and Sheboygan Counties, Wisconsin*, 2013. Strengthening Road Safety Legislation World Health Organization, 2013. This manual describes methods and resources for practitioners and decision makers to use for enacting new laws or regulations or amending existing ones as part of a comprehensive road safety strategy. The manual covers steps to be taken to address five main risk factors and post crash care. It can therefore be used to develop an understanding of the framework of legislation and relevant processes that are applicable in a country, review current national legislation and regulations and identify gaps that hinder implementation and enforcement of effective road safety measures, identify available resources including international agreements, evidence based guidance and recommendations on effective measures to improve legislation, prepare action plans to strengthen national legislation and regulations for the five main risk factors and for post crash care including advocating for improvement. Other important topics should also be addressed to achieve a comprehensive national system of road safety legislation and regulation, however they are beyond the scope of this manual. They include vehicle and helmet manufacturing standards and testing, third party insurance, victim's rights and compensation, a graduated driver licensing system, road audits and design standards and driving hours for commercial drivers.
