**Troubleshooting Electronically Controlled Automatic Transmission** Charmaine Gavi, Happyson Gavi, 2017-03. Electronic Automatic Transmission (EAT) has drastically evolved over the past two decades due to increase in global technological advancement and the need to have highly efficient automobile with improved fuel economy. Though modern EAT could be easily diagnosed for shifting problems with a mere scan tool and an oscilloscope, they are not necessarily easy to fix. Planetary gear controls, electronics and hydraulics of transmission have significantly changed in the past years. It was the Modulator Throttle valve, Accumulator and Governors that were used to control this. This book will educate you on new, quick, easy ways of troubleshooting a charging system without use of expensive equipment. This book addresses various input/output sensors to the PCM/ECM that controls the transmission system. The book addresses the various solenoids associated with the transmission system, such as the Shift Solenoids, Torque Converter Clutch Solenoid, TCC, and many more. The book will address the electronic/electrical theory behind the transmission systems, paying close attention to TCM architecture. Diagnostic Trouble Codes (DTCs) common in most American cars will be addressed in this book. More importantly, this book will address Harsh Shifts problems due to faulty pressure solenoid. Understanding this book will help anyone to understand the principle of operation behind every automatic transmission system and diagnostics procedures. This book is a must for everyone to have it.
